Stern, 1994-10 Examines the growth of representation and narratives in the history and practice of psychoanalysis Explores the close and necessary relationship between Freud's theories of representation the building of an internal mental world allowing us to give meaning to our experiences and narration the idea that personal experience might assume the character of a narrative and illustrates how they have developed the language of therapy and affected the practice of both psychoanalysis and developmental psychology Annotation copyright by Book News Inc Portland OR The Cambridge Introduction to Narrative H. example by Piaget and other founders of genetic structuralism they have been concerned predominantly with concepts of physical chronometrical time and related concepts e g velocity All the contributions to the present volume attempt to close this gap A larger number are especially interested in the narration of stories Overviews of the relevant literature as well as empirical case studies appear alongside theoretical and methodological reflections Most contributions refer to specifically historical phenomena and meaning constructions Some touch on the subjects of biographical memory and biographical constructions of reality Of all the various affinities between the contributions collected here the most important is their consistent attention to issues of the constitution and representation of temporal experience
