resilient society the cultivation of a renewed sense of place and community is essential as well Science and Sensibility argues for the need for ecology to engage with philosophical values and economic motivations in a political process of negotiation with the goal of shaping humans treatment of the natural world Michael Vincent McGinnis aims to reframe ecology so it might have greater trans scientific awareness of the roles and interactions among multiple stakeholders in socioecological systems and he also maintains that deep ecological knowledge of specific places will be crucial to supporting a sustainable society He uses numerous specific case studies from watershed coastal and marine habitats to illustrate how place based ecological negotiation can occur and how reframing our negotiation process can influence conservation restoration and environmental policy in effective ways Clay Figurines of the American Southwest Noel Morss,1954 *Forthcoming Books*
