Sculptural Ceramics:

Contemporary British Ceramics and the Influence of Sculpture Laura Gray, 2018-01-02 This book investigates how British contemporary artists who work with clay have managed in the space of a single generation to take ceramics from niche interest craft to the pristine territories of the contemporary art gallery This development has been accompanied and perhaps propelled by the kind of critical discussion usually reserved for the higher discipline of sculpture Ceramics is now encountering and colliding with sculpture both formally and intellectually Laura Gray examines what this means for the old hierarchies between art and craft the identity of the potter and the character of a discipline tied to a specific material but wanting to participate in critical discussions that extend far beyond clay Sculptural Ceramics Ian Gregory, 1999 In this book Ian Gregory first sketches the history of man's clay figure work He then provides essential technical information for the would be sculptural ceramacist The author uses examples of work from all over the world to show just what a diverse and creative area of ceramics this is Sculptural Ceramics has been designed as an introduction and practical hand book to the subject It is also an inspiration for other potters and a source of delight for all those interested in contemporary ceramics

Sculpture and Touch Peter Dent, 2017-07-05 Since the Renaissance at least the medium of sculpture has been associated explicitly with the sense of touch Sculptors philosophers and art historians have all linked the two often in strikingly different ways In spite of this long running interest in touch and tactility it is vision and visuality which have tended to dominate art historical research in recent decades This book introduces a new impetus to the discussion of the relationship between touch and sculpture by setting up a dialogue between art historians and individuals with fresh insights who are working in disciplines beyond art history The collection brings together a rich and diverse set of approaches with essays tackling subjects from prehistoric figurines to the work of contemporary artists from pre modern ideas about the physiology of touch to tactile interaction in the museum environment and from the phenomenology of touch in recent philosophy to the experimental findings of scientific study It is the first volume on this subject to take such a broad approach and as such seeks to set the agenda for future research and collaboration in this area
