Sculpture And Its Reproductions:

Sculpture and Its Reproductions Anthony Hughes, Erich Ranfft, 1997 This book is the first of its kind to focus on issues concerning sculpture and reproduction and to explore the theoretical and practical consequences **Classical Sculpture and the Culture of Collecting in Britain Since 1760** Vicky Coltman, 2009-08-06 This is an illustrated study of the reception of classical sculptures in the early modern period Vicky Coltman contrasts the culture of British 18th century collecting which integrated sculpture into the domestic interior with the focus upon individual specimens by archaeologists like Adolf Michaelis a century later **Remaking the Readymade** Adina Kamien-Kazhdan, 2018-05-11 Replication and originality are central concepts in the artistic oeuvres of Marcel Duchamp and Man Ray Remaking the Readymade reveals the underlying and previously unexplored processes and rationales for the collaboration between Duchamp Man Ray and Arturo Schwarz on the replication of readymades and objects The 1964 editioned replicas of the readymades sent shock waves through the art world Even though the replicas undermined ideas of authorship and problematized the notion of identity and the artist they paradoxically shared in the aura of the originals becoming stand ins for the readymades Scholar poet dealer Arturo Schwarz played a crucial role opening the door to joint or alternate authorship an outstanding relationship between artist and dealer By unearthing previously unpublished correspondence and documentary materials and combining this material with newly conducted exclusive interviews with key participants Remaking the Readymade details heretofore unrevealed aspects of the technical processes involved in the re creation of iconic long lost Dada objects Launched on the heels of the centenary of Duchamp's Fountain this new analysis intensifies and complicates our understanding of Duchamp and Man Ray initial conceptions and raises questions about replication and authorship that will stimulate significant debate about the legacy of the artists the continuing significance of their works and the meaning of terms such as creativity originality and value in the formation of art **The Ancient Art of Emulation** Elaine K. Gazda, 2002 Are copies of Greek and Roman masterpieces as important as the originals they imitate Contemporary Art and the Home Colin Painter, 2020-05-26 The home is for many people the location for their most intense relationships with visual things Because they are constructed through the objects we choose domestic spaces are deeply revealing of a range of cultural issues How is our interpretation of an object affected by the domestic environment in which it is placed Why choose a stainless steel teapot over a leopard print one How do the images hanging on the walls of our homes arrive there In placing contemporary art in the context of the ordinary home this book embarks on the contentious topic of whether high art impacts on ordinary people What is the size and nature of the audience for contemporary art in Britain Do people really visit more art galleries than attend football matches What is the significance of the home in relation to such questions Indeed what constitutes art in the home This book carefully unpicks these questions as well as the troubled relationship between the home as a place of comfort and reassurance and the often unsettling and challenging images offered by contemporary art Within the art world the home

has been addressed as a subject and even used as a temporary gallery and a space for installations and yet it is not common for works by today's avant garde artists to be conceived and marketed to participate in the domestic lives that most people live. Handsomely illustrated, this book unites contemporary art, craft and design with sociology, anthropology and cultural studies to provide an unusual and forthright addition to ongoing art and culture debates. **Year Book of the**

United States Government Organization Manual, 1966 "Orientalism, Eroticism and Modern Visuality in Global Cultures" Julie Codell, 2017-07-05 In *Orientalism, Eroticism and Modern Visuality in Global Cultures*, scholars look afresh at representations of nineteenth century oriental bodies inquiring deeply into their erotic dimensions, tracing their global dissemination at cross cultural intersections of the visual and the political. Authors consider the impact of eroticized orientalist representations registered on racial and gendered bodies at historical moments across the globe in the media of photography, painting, prints and sculpture by contextualizing the visual within social practices, ethnography, literature, travel writing and the dynamics of imperialism. Authors examine orientalism's politico erotic import across not only imperial Britain and France but also throughout India and the Middle East, initiating cross cultural analyses of orientalism outside of Europe. Works studied include Orientalist and homoerotic works by canonic artists such as Ingres, G. Me. Delacroix and Girodet and lesser known artists such as sculptor Raffaele Monti and painter Elisabeth Jerichau Baumann. Contributors explore Turkish and European writings, explorer Richard Burton's self-fashioning and popular Orientalist photography in India and the Middle East. Authors draw on methods from gender studies, semiotics, material culture and psychoanalysis to explore art, national identity, homoerotic subcultures, female agency, class, sexuality and colonialism. The book is directed to interdisciplinary scholars and students in art history, literature history and postcolonial studies. *Monumental News; Devoted to*

Monumental and Kindred Interests, 1916 **Imperial Rome and Christian Triumph** Jas Elsner, 1998 Western culture saw some of the most significant and innovative developments take place during the passage from antiquity to the middle ages. This stimulating new book investigates the role of the visual arts as both reflections and agents of those changes. It tackles two inter-related periods of internal transformation within the Roman Empire: the phenomenon known as the Second Sophistic c. ad 100-300, two centuries of self-conscious and enthusiastic Hellenism; and the era of late antiquity c. ad 250-450, when the empire underwent a religious conversion to Christianity. Vases, murals, statues and masonry are explored in relation to such issues as power, death, society, acculturation and religion. By examining questions of reception, viewing and the culture of spectacle alongside the more traditional art historical themes of imperial patronage and stylistic change, Jas Elsner presents a fresh and challenging account of an extraordinarily rich cultural crucible in which many fundamental developments of later European art had their origins. A highly individual work, wonderful visual and comparative analysis. I can think of no other general book on Roman art that deals so elegantly and informatively with the theme of visuality and visual desire. Professor

Natalie Boymel Kampen Barnard College New York exciting and original a vibrant impression of creative energy and innovation held in constant tension by the persistence of more traditional motifs and techniques Elsner constantly surprises and intrigues the reader by approaching familiar material in new ways Professor Averil Cameron Keble College Oxford

Classical Art Caroline Vout, 2018-05-29 How did the statues of ancient Greece wind up dictating art history in the West How did the material culture of the Greeks and Romans come to be seen as classical and as art What does classical art mean across time and place In this ambitious richly illustrated book art historian and classicist Caroline Vout provides an original history of how classical art has been continuously redefined over the millennia as it has found itself in new contexts and cultures All of this raises the question of classical art's future What we call classical art did not simply appear in ancient Rome or in the Renaissance or in the eighteenth century Academy Endlessly repackaged and revered or rebuked Greek and Roman artifacts have gathered an amazing array of values both positive and negative in each new historical period even as these objects themselves have reshaped their surroundings Vout shows how this process began in antiquity as Greeks of the Hellenistic period transformed the art of fifth century Greece and continued through the Roman empire Constantinople European court societies the neoclassical English country house and the nineteenth century up to the modern museum A unique exploration of how each period of Western culture has transformed Greek and Roman antiquities and in turn been transformed by them this book revolutionizes our understanding of what classical art has meant and continues to mean

The Throne of the Great Mogul in Dresden Dror Wahrman, 2023-04-25 A masterful deciphering of an extraordinary art object illuminating some of the biggest questions of the eighteenth century The Throne of the Great Mogul 1701-8 is a unique work of European decorative art an intricate miniature of the court of the Mughal emperor Aurangzeb depicted during the emperor's birthday celebrations It was created by the jeweler Johann Melchior Dinglinger in Dresden and purchased by the Saxon prince Augustus the Strong for an enormous sum Constructed like a theatrical set made of gold silver thousands of gemstones and amazing enamel work it consists of 164 pieces that together tell a detailed story Why did Dinglinger invest so much time and effort in making this piece Why did Augustus in the midst of a political and financial crisis purchase it And why did the jeweler secrete in it messages wholly unrelated to the prince or to the Great Mogul In answering these questions Dror Wahrman while shifting scales from microhistory to global history opens a window onto major historical themes of the period the nature of European absolutism the princely politics of the Holy Roman Empire the changing meaning of art in the West the surprising emergence of a cross continental lexicon of rulership shared across the Eastern Hemisphere and the enactment in jewels and gold of quirky contemporary theories about the global history of religion

Chinese Sculpture from the Fifth to the Fourteenth Century, 1925 *Images of the Art Museum*
Eva-Maria Troelenberg, Melania Savino, 2017-02-06 In recent years the emerging field of museum studies has seen rapid expansion in the critical study of museums and scholars started to question the institution and its functions To contribute

differentiated viewpoints to the currently evolving meta discourse on the museum this volume aims to investigate how the institution of the museum has been visualized and translated into different kinds of images and how these images have affected our perception of these institutions In this interdisciplinary collection scholars from a variety of academic backgrounds including art history heritage museums studies and architectural history explore a broad range of case studies stretching across the globe The volume opens up debate about the epistemological and historiographical significance of a variety of different images and representations of the Art Museum including the transformation or adaptation of the image of the art museum across periods and cultures In this context this volume aims to develop a new theoretical framework while proposing new methodological tools and resources for the analysis of museological representations on a global scale
