Sdi And Industrial Technology Policy:

SDI and Industrial Technology Policy Walter Zegveld, Christien Enzing, 1987 Om de industrielle policyaspekter af stjernekrigsprojektet Konklusionen er at Europa forventedes at f mindre gavn af den nye teknologi **SDI and Industrial Technology Policy** Walter Zegveld, Christien Enzing, 1987 Om de industrielle policyaspekter af stjernekrigsprojektet Konklusionen er at Europa forventedes at f mindre gavn af den nye teknologi **Photonic Technology and Industrial Policy** Ernest Sternberg, 1992-01-01 A revolutionary technological development of the late twentieth century photonics embraces lasers fiber optics imaging devices and optical applications to computing It affects the fortunes of numerous industries and other than conventional microelectronics may now be the leading arena for worldwide technological rivalry While Japan has seen its photonic industries grow faster than any other high technology sector the United States where much of photonics originated has experienced a declining industrial capability in world markets Why is the U S floundering in this critical new technology Are market solutions adequate as a national response to such massive technological change After describing the history and economic implications of photonics this book places these questions in the context of industrial policy debates about the proper role of government in response to strategic industrial sectors The author then assesses the U S public policy response by examining various government programs directed at photonics These programs add up to an implicit government photonics policy but one that is shortsighted incoherent and unplanned Sternberg concludes that it is this failure to plan that explains United States retrogression in a critical technology **The Strategic Defense Initiative** Edward Reiss, 1992-07-23 This history of the Strategic Defense Initiative ranges across politics economics strategic studies and international relations and provides the latest research into the SDI interest groups the distribution of contracts and the politics of influence It discusses the wider contexts of Star Wars such as alliance management marketing and domestic politics and its military spin offs especially for anti satellite ASAT and space control programmes The author tests the theoretical literature on the dynamics of the arms race by using SDI as a case study and draws evidence from sources such as congressional hearings interviews the trade press restricted briefing papers and documents obtained under the US Freedom of Information Act The book follows the fortunes of strategic defence into the changed global conditions of the 1990s following the collapse of the Soviet bloc the Gulf War and President Bush s announcement of a refocused SDI the Global Protection Against Limited Strikes GPALS **The State and Technology Policy**, 1988 The Rise of the Gunbelt Ann R. Markusen, 1991 Index and bibliographical references included **Military Production and Innovation in Spain** Jordi Molas-Gallart, 1992 Military Production and Innovation in Spain extends the scope beyond the traditional analysis of arms producers to include components and sub systems manufacturers It combines a description of the changes experienced by Spanish military production with an analysis of its deeply rooted structural characteristics The book provides an in depth exploration of the Spanish military related industry its links with the rest of the economy and its potential role as a

technological engine for the Spanish economy **Space** ,1990 **Bulletin of the Atomic Scientists** ,1987-06 Special Reference Briefs ,1983 **Ballistic Missile Defense In The Post-cold War Era** David B H Denoon,2021-11-28 With the end of the Cold War and the visibility of U S Patriot missile defenses during the 1991 Gulf War the cost and benefits of ballistic missile defense systems BMD need to be re evaluated In this detailed and balanced study David Denoon assesses new types of short range and intercontinental missile defenses In the post Cold War era two fundamental changes have made missile defense for the United States and its military forces more compelling The United States and Russia no longer see each other as direct threats and there has been a dramatic proliferation of ballistic missile capability in the Third World Consequently U S forces deployed overseas are more likely to be at risk and eventually the United States itself could become vulnerable to missile threats With these changes in mind David Denoon analyzes the current BMD dilemma arguing that active defenses against missiles should be seen as a form of insurance against catastrophe He assesses the likelihood of missile attacks and the appropriate level of investment for the United States to defend against such attacks The book provides an assessment of deterrence and the performance of the Patriot missiles during the 1991 Gulf War critiques the Strategic Defense Initiative and analyzes the prospects for new types of short range and intercontinental missile defenses

Issues in Science and Technology ,1987 **New Technologies and the Arms Race** Carlo Schaerf,Brian Holden Reid,David Carlton,2016-01-07 This volume contains the proceedings of the International Conference on Technology Arms Race and Disarmament which took place at Castiglione della Pescaia Italy in September 1987 The papers examine strategic defence policies nuclear weapons proliferation and arms control among many other topics *The Economics of Defence, Disarmament, and Peace* Keith Hartley,Nick Hooper,1990 This major reference work is a comprehensive critical guide to the large and growing literature on the economics of defence disarmament and peace It covers the cost of defence spending and its effects on growth investment unemployment technical change and other aspects of a nation s economic performance It includes material on the determinants of defence spending namely defence budgets programme budgeting and procurement policy It also deals with the economic impact of arms limitation disarmament and the conversion from military production to products with peaceful uses *Redeemer Nation* Orrin Schwab,2004 In this book Dr Orrin Schwab develops the concept of the modern technocratic state as part of a global technocratic culture and civilization The author argues that technocratic cultural and institutional forms were and are part of a collective script for Western culture The American script combined the scientific commercial and technological aspects of the Enlightenment with the radical 17th century Protestant belief in America as a new Zion In the twentieth century the synthesis of mission along with global technocratic knowledge and institutions created the Wilsonian liberal technocratic order As the principal agent and protector of the modern capitalist international system America the self defined Redeemer Nation has moved through the controlled anarchy of international relations from one war and crisis to the next confirmed in its self defined role and mission *Arms Control Today* ,1987

The European Union and National Industrial Policy Hussein Kassim, Anand Menon, 2002-09-11 Although the implications of EU membership have been the subject of intense political debate and academic enquiry throughout the member states the actual impact of EU action on those states remains under researched The lack of empirical investigation has meant that it has not been possible to arrive at any informed judgement about how the EU has affected traditional policy making in the member states or to evaluate competing claims The European Union and National Industrial Policy investigates the extent to which action at the EU level in a range of industrial financial and service sectors has affected the substance of national policy and the behaviour of and relationships between national actors It looks at the policies pursued by the four larger member states in these areas discussing the initiatives launched by the EU and assessing the Union's impact on national policy compared with other internal and external factors The European Union and National Industrial Policy offers a unique investigation of the relationship between the Union and member states that is empirically based and theoretically reflective In an attempt to overcome the boundaries that have traditionally separated international relations political science public policy and other social sciences it uses insights from a number of perspectives to assess the impact of the EU on the ability of member states to choose and implement their goals
