## Sea Power Of The State:

**The Sea Power of the State** S.G. Gorshkov, 2013-10-22 Admiral Gorshkov has transformed the Soviet fleet into a world sea power for the first time in Russian history He is Russia's most brilliant naval strategist of all time He has created the modern Soviet navy His book examines the main components of sea power among which attention is focused on the naval fleet of the present day capable of conducting operations and solving strategic tasks in different regions of the world's oceans together with other branches of the armed forces and independently China, the United States, and 21st-Century

Sea Power Andrew S. Erickson, Lyle J Goldstein, Nan Li, 2010-12-01 China's reaction to the United States new maritime strategy will significantly impact its success according to three Naval War College professors Based on the premise that preventing wars is as important as winning wars this new U S strategy they explain embodies a historic reassessment of the international system and how the United States can best pursue its interests in cooperation with other nations The authors contend that despite recent turbulence in U S China military relations substantial shared interests could enable extensive U S China maritime security cooperation as they attempt to reach an understanding of competitive coexistence But for professionals to structure cooperation they warn Washington and Beijing must create sufficient political and institutional space

*Summary of Andrew Lambert's Seapower States* Milkyway Media, 2024-05-20 Get the Summary of Andrew Lambert's *Seapower States* in 20 minutes Please note This is a summary not the original book *Seapower States* explores the historical development and strategic significance of maritime powers in the context of global politics and commerce The book traces the origins of seapower to ancient coastal communities that relied on the sea for trade leading to the creation of inclusive governments and naval forces to protect economic interests Maritime societies like Athens and Carthage prioritized exploration and commerce over territorial conquest contrasting with land empires **Architects of Continental Seapower**

Jeremy Stocker, 2020-10-01 This book describes and analyses two iconic figures in twentieth century naval history the German Admiral Alfred von Tirpitz and the Russian Admiral Sergei Gorshkov It examines the men what they thought and wrote about seapower the fleets they created and the strategic consequences of what they did More broadly it draws on the respective histories of the post 1897 Imperial German Navy and the post 1956 Soviet Navy to examine the continental bid for large scale seapower The work argues that both individuals built navies that did not and could not fulfil the objectives for which they were created Drawing on the legacies of both men the book also develops some wider ideas about the creation of large navies by continental states with cautionary lessons for today's emerging powers India and China Both admirals have received book length biographies but this is the first attempt at a comparative study and the first to draw broader strategic lessons from their respective attempts as continental navalists to challenge maritime states This book will be of much interest to students of naval history strategic studies and International Relations **Sea Power of the State** Sergei

**Sea Power** Charles Hall (H.),1916 Testing American Sea Power Craig C. Felker,2013-03-28 The Pacific Theater in World War II depended on American sea power This power was refined between 1923 and 1940 when the U S Navy held twenty one major fleet exercises designed to develop strategy and allow officers to enact plans in an operational setting Prior to 1923 naval officers relied heavily on the theories of Capt Alfred Thayer Mahan who argued that sea control was vital to military victory best attained through use of the battleship Fleet exercises however allowed valuable practice with other military resources and theories As a direct result of these exercises the navy incorporated different technologies and updated its own outdated strategies Although World War II brought unforeseen challenges and the disadvantages of simulation exercises quickly became apparent fleet problems may have opened the door to different ideas that allowed the U S Navy ultimately to succeed Testing American Sea Power challenges the conventional wisdom that Mahanian theory held the American Navy in a steel grip Felker s research and analysis the first to concentrate on the navy s interwar exercises will make a valuable contribution to naval history for historians military professionals and naval instructors
