The Dieppe Raid UK War Office,2019-03-30 A battle summary of Britain s raid on the French port town of Dieppe during World War II Winston Churchill was under pressure The Soviets felt that they were fighting the Germans by themselves Stalin demanded Britain open a second front to draw German forces away from the east Though the advice Churchill received from his staff was that an invasion of France would not be possible for at least another year the British Prime Minister knew he had to do something to help the Russians The result was a large scale raid upon the port of Dieppe chosen as it was thought that the success of any invasion would depend on the capture of a major port to enable heavy weapons vehicles and reinforcements to be landed in support of the landing forces It would not be the second front that Stalin wanted but at least it would demonstrate Britain s intent to support the Soviets Plus it provided a rehearsal for the eventual invasion The raid upon Dieppe Operation Jubilee was eventually scheduled for 19 August 1942 The assault was the most ambitious Allied attack against the German Channel defenses of the war so far involving some 6 000 infantry 237 naval vessels and seventy four squadrons of aircraft Though the debate surrounding Jubilee s purpose and cost has raged in the years since the war many vital and important lessons were learned All these factors are covered in this official battle summary a detailed and descriptive account of the Dieppe Raid which was written shortly after the war and is based on the recollections of those who were involved

Becoming a No-Fail Mission: The Origins of Search and Rescue in Canada James Pierotti,2018-09-27 The Royal Canadian Air Force s RCAF s involvement with the search and rescue SAR mandate in Canada dates to 1947 The RCAF s Air Sea Rescue predecessor capability from the Second World War

dates back to 1942 How and why did the RCAF become involved with both of those capabilities and is there historical rationale for the continued involvement of the RCAF in the domestic SAR service today Amplified with operational examples of the rescue system in action this previously untold history aims to describe the origins of SAR history in Canada and to further the debate on the continued use of military resources for domestic responsibilities **A Raid on the Red Sea** Amos Gilboa,2021-03 A Raid on the Red Sea is a thrilling real life story of gun running and the intelligence and military operation that foiled it The RAF Air-Sea Rescue Service in the Second World War Norman Franks,2016-11-30 When the Second World War began in 1939 it was thought that it would be fought along the same lines as the First World War with the Allied air forces operating from both Britain and France With the fall of Britains Northern European Allies in May 1940 all that changed From then onwards RAF aircraft operating over enemy and enemy held territory necessitated flights across both the North Sea and the English Channel This meant that aircrew in difficulties would be forced to come down in both of these bodies of water Therefore it was essential that some form of rescue service be made available to fish these airman from the water But there were no aircraft in existence at that time that were designed for such a task initially all that could be done was to use land planes to help locate anyone in the water drop a dinghy to them and then guide a boat to their position Obviously a quicker and more reliable means of rescue was needed and this came in the shape of the Supermarine Walrus an amphibian airplane that could land on both sea and land Several Flights of these airplanes were set up around the coast of Britain concentrated mainly around the south and southeast of England The Air Sea Rescue airmen did a magnificent job from 1941 45 rescuing hundreds of downed RAF and USAAF aircrew It took a special type of airman to undertake these rescues and another kind of courage As the war in North Africa developed Walrus aircraft were needed in the Mediterranean and later on either side of the Italian coast Walrus squadrons operated just as successfully in this theater as around Britain Aircrew operating over any stretch of water could always count on the ASR boys coming to their aid This is their story

Rescue the Surviving Souls Adam Teller,2020-04-14 A groundbreaking examination of a little known but defining episode in early modern Jewish history A refugee crisis of huge proportions erupted as a result of the mid seventeenth century wars in the Polish Lithuanian Commonwealth Tens of thousands of Jews fled their homes or were captured and trafficked across Europe the Middle East and North Africa Rescue the Surviving Souls is the first book to examine this horrific moment of displacement and flight and to assess its social economic religious cultural and psychological consequences Drawing on a wealth of primary sources in twelve languages Adam Teller traces the entire course of the crisis shedding fresh light on the refugee experience and the various relief strategies developed by the major Jewish centers of the

day Teller pays particular attention to those thousands of Jews sent for sale on the slave markets of Istanbul and the extensive transregional Jewish economic network that coalesced to ransom them. He also explores how Jewish communities rallied to support the refugees in central and western Europe as well as in Poland and Lithuania, doing everything possible to help them overcome their traumatic experiences and rebuild their lives. *Rescue the Surviving Souls* offers an intimate study of an international refugee crisis from outbreak to resolution that is profoundly relevant today.

The Royal Naval Medical Service Jack Leonard Sagar Coulter, 1954

Airmen Against the Sea George Albert Llano, 1956

Airmen Against The Sea is the fourth in a series of ADTIC studies to determine how military personnel survived under meergency conditions in various parts of the world. Its predecessors *999 Survived Sun Sand and Survival and Down In the North* dealt with survival respectively in the Southwest Pacific Tropics, in the African Deserts, and in the Arctic. This study concerns survival at sea and like its predecessors employs the topical approach. It is not a water survival manual but is a factual report of what happened to men who bailed out or ditched at sea and whose only refuge for days on end was a rubber life raft. Under such topical headings as bailout versus ditching, survival equipment, the life raft, food hazards, injuries, morale, and many others, the experiences of the survivors themselves are emphasized. The result is a new and fresh insight into the problems of survival at sea which will be of interest to all those who fly over water and of particular value to those concerned directly with rescue operations, with water survival training, and with the development of survival materiel.
