informed historical understanding of navies and sea power Navies of Europe Lawrence Sondhaus, 2014-06-11 Europe ruled the waves for most of the modern era and even when its navies were eclipsed in size by the US force they continued to dominate world wars In this unique history of Europe's naval forces Larry Sondhaus charts the development of naval warfare from the transition to steam to recent actions in the Persian Gulf Combining detailed technical information with an in depth comparison of warfare and tactics across some of the key conflicts of the modern world this is an absorbing account of European and British seapower past and present A Concise History of Modern Europe David S. Mason, 2022-06-29 Highlighting the key events ideas and individuals that shaped modern Europe this lively book provides a concise history of the continent from the Enlightenment to the present day Drawing on the enduring theme of revolution David S Mason explores the political economic and scientific causes and consequences of revolution the development of human rights and democracy and issues of European identity and integration He deliberately avoids a detailed chronology of every country and time period instead emphasizing the most crucial events in shaping contemporary Europe Fourteen focused chapters address such topical issues as the Enlightenment the French Revolution and Napoleon the Industrial Revolution the theories and impact of Marx and Darwin the revolutions of 1848 1917 and 1989 the unifications of Germany and Italy European imperialism the two world wars the Cold War the evolution and expansion of the European Union and current issues confronting Europe Any reader who wants to view the broad sweep of European history will find this book an engaging narrative supplemented with maps timelines sidebars photos and a glossary **The Future of Sea Power** Eric Grove, 2021-05-30 This book first published in 1990 presents a fundamental reassessment of maritime strategy It analyses the lessons of twentieth century naval warfare and examines in detail the changing face of naval warfare both in terms of the weapons used and the platforms from which they are launched and controlled It looks at the evolving uses of the seas both economic and military and sets sea power against the developing world environment political legal and economic discussing those factors that stimulate nations to exert power at sea and those that limit their naval capabilities It also develops a theoretical framework for future thinking about maritime strategy and forces revises and updates Mahan's classical analysis of the foundations of sea power and discusses thinking about naval tasks **Modern Sea Power** Geoffrey Till, 1987 **NRL Report** , Air University Library Index to Military Periodicals , 1999 The Late Victorian Navy Roger Parkinson, 2008 A reappraisal of the late Victorian Navy the so called Dark Ages showing how the period was crucial to the emergence of new technology defined by steel and electricity In purely naval terms the period from 1889 to 1906 is often referred to and indeed passed over as the pre Dreadnought era merely a prelude to the lead up to the First World War and thus of relatively little importance it has therefore received little consideration from historians a gap which this book remedies by reviewing the late Victorian Navy from a radically new perspective It starts with the Great Near East crisis of 1878 and shows how its aftermath in the Carnarvon Commission and its evidence produced a profound shift in strategic thinking culminating in the Naval

Defence Act of 1889 this evidence from the ship owners provides the definitive explanation of why the Victorian Navy gave up on convoy as the primary means of trade protection in wartime a fundamental question at the time The book also overturns many assumptions about the era especially the perception that the navy was weak and clearly shows that the 1870s and early 1880s brought in crucial technological developments that made the Dreadnought possible Department of Defense Authorization for Appropriations for Fiscal Year 1986: Sea power and force projection United States.
