Contact with Alien Civilizations Michael Michaud,2010-05-05 The proper study of mankind is not merely Man but Intelligence 1 Arthur C Clarke 1951 In the long running television series The X Files the original Deep Throat said to FBI Special Agent Mulder that there are those like yourself who believe in the existence of extraterrestrial life Ah but that s not the question If extraterrestrial life exists most of it may be in simpler forms comparable to the one celled organisms of Earth biology Finding such life would be fascinating for scientists but may be of only passing interest to the general public What

intrigues the average citizen is the possibility of contact with extraterrestrial intelligence We want to communicate with other sentient beings learning what they know and telling them about ourselves We want to find out how they are like us and how they are different Microorganisms don't have a lot to say There is another implication of contact that underlies this book Intelligent extraterrestrials might have an impact on our future The information they send us if any might change our cultures They could have conscious intentions toward us and possibly the technologies to reach us directly Their intentions may be benign or not Our interest in alien minds is not new The idea that intelligent beings exist beyond the Earth has been part of the Western intellectual tradition for more than 2000 years Sometimes this belief was widespread at other times it was out of fashion

Civilized Life in the Universe George Basalla, 2006-01-19 This book is a selective and fascinating history of scientific speculation about intelligent extraterrestrial life From Plutarch to Stephen Hawking some of the most prominent western scientists have had quite detailed perceptions and misperceptions about alien civilizations Johannes Kepler fresh from transforming astronomy with his work on the shape of planetary orbits was quite sure alien engineers on the moon were excavating circular pits to provide shelter Christiaan Huygens the most prominent physical scientist between Galileo and Newton dismissed Kepler's speculations but used the laws of probability to prove that planetarians on other worlds are much like humans and had developed a sense of the visual arts Carl Sagan sees clearly that Huygens is a biological chauvinist but doesn't see as clearly that he Sagan may be a cultural technological chauvinist when he assumes aliens have highly developed technology like ours but better Basalla traces the influence of one speculation on the next showing an unbroken but twisting chain of ideas passed from one scientist to the next and from science to popular culture He even traces the influence of popular culture on science Sagan always admitted how much E R Burroughs' Martian novels influenced his speculations about Mars Throughout Basalla weaves his theme that scientific belief in and search for extraterrestrial civilizations is a complex impulse part secularized religious and part anthropomorphic He questions the common modern scientific reasoning that life converges on intelligence and intelligence converges on one science valid everywhere He ends the book by agreeing with Stephen Hawking usually a safe bet that intelligence is overrated for survival in the universe and that we are most likely alone

The Search for Extra Terrestrial Intelligence David Lamb, 2005-07-26 Is the Search for Extra Terrestrial Intelligence a genuine scientific research programme David Lamb evaluates claims and counter claims and examines recent attempts to establish contact with other intelligent life forms He considers the benefits and drawbacks of this communication how we should communicate and whether we actually can He also assesses competing theories on the origin of life on Earth discoveries of former solar planets proposals for space colonies and the consequent technical and ethical issues
