Scheeren, 2012-02-02 Google is certainly a useful Internet search tool for general topics but most of the information available on the Invisible Web can't be found through Google This book explains the value of the Invisible Web and how to access it Most students and researchers possess only rudimentary Internet searching skills The majority of school and public librarians are not aware of the breadth and depth of information available on the Hidden Web This is unfortunate as the ability to navigate the Hidden Web in schools and public libraries is essential to locating the most current and authoritative information The Hidden Web A Sourcebook serves as a valuable source of information about the Hidden Web much of which comprises websites containing statistical information or data from a wide variety of government agencies The concepts search techniques and specific websites presented will be helpful in information literacy instruction and the teaching of research skills **Libraries and Google** William Miller, Rita M. Pellen, 2014-04-23 Discover the benefits and drawbacks of Google Google has become a nearly omnipresent tool of the Internet with its potential only now beginning to be realized How can librarians effectively integrate this powerful search engine to provide service to their patrons Libraries and Google presents leading authorities discussing the many possibilities of using Google products as effective user friendly tools in libraries Google Scholar and Print are extensively explored with an eye toward offering an expanded view of what is and may be possible for the future with practical insights on how to make the most of the product's capabilities It seems certain that Google is here to stay Libraries and Google comprehensively examines this disruptive technology that is seen as both a threat and an opportunity by both librarians and publishers Both perspectives are explored in depth along with practical applications of this and other Google technology that may be new to librarians Google products and other more familiar research tools are compared for effectiveness and ease of use The various unique needs of users and scholars are detailed and considered as a springboard for insightful discussion of the future role of librarians in today's world Potential problems are closely examined such as copyright issues of digitization and privacy concerns sparked by its collection of personal

information about its users The book comprehensively explores the path libraries need to travel to benefit from the search tool rather than being overwhelmed and destroyed by it Topics in Libraries and Google include the viewpoint that Google may make libraries obsolete new opportunities for libraries through using Google products technical aspects of purchasing and implementing Google search products with proprietary vendor databases testing the performance of Google Scholar and Print practical use of Google s products personal privacy issues making digitized library resources more accessible digitization of copyrighted materials much much more Libraries and Google is horizon expanding reading for all librarians library science educators and students library administrators publishers and university presses Volume 2 of Libraries and Google is in preparation Google is a Registered Service Mark of Google Inc Mountain View California Libraries and Google is an independent publication offered by The Haworth Press Inc Binghamton New York and is not affiliated with nor has it been authorized sponsored endorsed licensed or otherwise approved by Google Inc *CriticalThinking.com* Myron Tuman,2002 Critical Thinking com is bound to raise a few hackles It takes on two major thought clic h s of today s world first that critical thinking is the ultimate form of thinking and that we know what it is when we encounter it and second that the Internet promises us a brave new world of virtual literacy that will not only replace traditional literacy but improve it Partly philosophical partly practical partly pedagogical Critical Thinking com is mostly a refreshing look at the interaction of knowledge production and technology It is smart more than a little daring and probably will make you think a little differently about some of the things you thought you knew Gerald Early Merle Kling Professor of Modern Letters Washington University Critical thinking has been oversold as a cure for ignorance and apathy Myron Tuman exposes the shallowness of the conventional recipes and provides a good thing instead a book of incisive distinctions captivating material and provocative reflections It is bound to leave the reader a more thoughtful person Albert Borgmann Department of Philosophy The University of Montana Table of Content Prologue Critical Thinking for Dummies 9 Chapter 1 Thinking Critically about Critical Thinking 13 Critical Questions Analysis or Reflection Which One Is Critical Analysis and Progress A Cautionary Conclusion about Critical Thinking Seven Elements of Critical Thinking as Reflection Coda Descartes and Questioning Chapter 2 39 Finding and Evaluating Web Content The Open Web The Invisible Web The Gated Web Libraries and Web Access Facts Commentary and Experts Hot Topics and Emily Dickinson Summary Stephen King on the Web Coda Stephen King for Free Chapter 3 73 News and Reflection The Two Sides of Thomas Jefferson Internal and External Clues More on Authority News on the Web Plato and Rushkoff Coda Cold Fusion Chapter 4 99 The End of Books and Libraries What Is a Book What Does It Mean to Read Two Models of Libraries Libraries Without Walls Libraries Without Books Coda Books Libraries and Marshall McLuhan Chapter 5 121 The Free World of the Web The First Freedom Expression The Second Freedom Information The Third Freedom Association Defining Community Coda Thomas Jefferson Revisited Chapter 6 143 Grassroots and Astroturf Promotion Top Down and Bottom Up Grassroots and Astroturf Selling with Buzz Coda Swag and
