Searching The Web For Health:

Searching the Web for Health Gary Paul Bryant, 2004 Sick and tired of trying to muddle through the enormous volume of confusing health information on the web Finding it impossible to distinguish factual remedies from contrived marketing ploys Searching the Web for Health is the up to date resource you can rely on to show you how to get the most out of surfing the web for the health information you need Whether you want to relieve a bad cough or find the most advanced research on cancer treatment Searching the Web for Health will help you separate fact from fiction and give you the strategies knowledge and expert resources you need to navigate through the web with ease and confidence Written by a technology professional and consumer health advocate Searching the Web for Health weeds out the medical miracles from the medical marketing including 400 hospital university and private company websites all actively involved in cutting edge health care Search engines and directories to steer you towards finding your answers Health information on the web Search techniques With Searching the Web for Health you can now actively and informatively contribute to the medical decisions that affect your life Web Search: Public Searching of the Web Amanda Spink, Bernard J. Jansen, 2006-02-21 This book brings together results from the Web search studies we conducted from 1997 through 2004 The aim of our studies has been twofold to examine how the public at large searches the Web and to highlight trends in public Web searching The eight year period from 1997 to 2004 saw the beginnings and maturity of public Web searching Commercial Web search engines have come and gone or endured through the fall of the dot com companies We saw the rise and in some cases the demise of several high profile publicly available Web search engines The study of the Web search is an exciting and important area of interdisciplinary research Our book provides a valuable insight into the growth and development of human interaction with Web search engines In this book our focus is on the human aspect of the interaction between user and Web search engine We do not investigate the Web search engines themselves or their constantly changing interfaces algorithms and features We focus on exploring the cognitive and user aspects of public Web searching in the aggregate We use a variety of quantitative and qualitative methods within the overall methodology known as transaction log analysis **Web Search** Amanda Spink, Michael Zimmer, 2008-09-16 The inspiration for this book emerged from the editors participation in a panel discussion on Web search engines at an annual meeting of the Association of Internet Researchers This multidisciplinary panel of Web search researchers revealed the diversity of scholars interested in Web searching coupled with a broad range of questions attitudes and approaches It became clear that more cross fertilization was necessary between the disciplines to ensure Web search engines the entities and Web searching the user behavior received the thorough scholarly attention they deserved This book is a result of that realization and an important first step in achieving new levels of awareness and collaboration across disciplines The book represents a core theme within the intellectual pursuits of the editors The first editor Spink is an information scientist who has worked with taught and has researched the informational dimensions of Web searching since

1997 The second editor Zimmer is a scholar of culture and communication who focuses on the political and ethical dimensions of new media and information technologies and whose dissertation research focused on the value related consequences of the quest for the perfect search engine **Web Health Information Resource Guide** Eugene A. DeFelice, 2001-08 This book provides a guide means at your fingertips to quickly and easily search the Internet Web and find the best of current health information You can take charge control and responsibility for your own health wellness and healthcare and make informed decisions with your physician or healthcare provider In this way you can improve your own health help avoid serious medical surgical errors and live a healthier happier longer and more enjoyable life Information is provided on health overview on a number of relevant topics essentials of the Web Internet a variety of Web health search tools the author s list of 70 key selected useful search tools and Web sites and over 300 health and wellness resources and their corresponding Web sites Useful suggestions for optimizing searching the Web for health wellness and healthcare information are made available Time Magazine states that 100 million Americans now consult the Internet Web for health information and 70% find the information useful This book greatly facilitates your obtaining and using such Web health wellness and healthcare information *Web Portals* Arthur Tatnall, 2005-01-01 A Web Portal is a special web site designed to act as a gateway giving convenient access to other related sites This book investigates the various types of portals and describes how they can be used in business applications After considering the nature of portals the book describes the first general portals like Yahoo and how they came into being Portals are used in businesses of all types and sizes and this book discusses how portals can be used in large business corporations as well as small to medium enterprises Web portals have increasing importance to marketers as by their nature they retain their users who must return to them frequently They also provide a useful means of making information and knowledge readily available in a convenient form to authorised users This book covers a wide range of issues relating to the use of portals in business *Google* Sarah Milstein, Rael Dornfest, 2004 Google is the planet s most popular program for finding stuff on the Web but it has no manual As it turns out Google has many hidden tricks and tools that can turn simple searching into powerful and successful discoveries Google The Missing Manual is a friendly deskside companion brimming with tips for getting more out of the world s favorite search program 0 596 00613 6 19 95 O Reilly Associates **Human-Computer Interaction: Applications and Services** Masaaki Kurosu, 2013-07-01 The five volume set LNCS 8004 8008 constitutes the refereed proceedings of the 15th International Conference on Human Computer Interaction HCII 2013 held in Las Vegas NV USA in July 2013 The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of Human Computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas This volume contains papers in
