The Devil in the White City Erik Larson, 2004-02-10 1 NATIONAL BESTSELLER NATIONAL BOOK AWARD FINALIST

From the 1 New York Times bestselling author of *The Splendid and the Vile* comes the true tale of the 1893 World's Fair in Chicago and the cunning serial killer who used the magic and majesty of the fair to lure his victims to their death. As absorbing a piece of popular history as one will ever hope to find. *San Francisco Chronicle* A Kirkus Reviews Best Nonfiction Book of the Century A Los Angeles Times Best Nonfiction Book of the Last 30 Years. Combining meticulous research with nail biting storytelling Erik Larson has crafted a narrative with all the wonder of newly discovered history and the thrills of the best fiction. Two men each handsome and unusually adept at his chosen work embodied an element of the great dynamic that characterized America's rush toward the twentieth century. The architect was Daniel Hudson Burnham the fair's brilliant director of works and the builder of many of the country's most important structures including the Flatiron Building in New York and Union Station in Washington D.C. The murderer was Henry H. Holmes a young doctor who in a malign parody of the White City built his World's Fair Hotel just west of the fairgrounds a torture palace complete with dissection table gas chamber and 3,000 degree crematorium. Burnham overcame tremendous obstacles and tragedies as he organized the talents of Frederick Law Olmsted Charles McKim Louis Sullivan and others to transform swampy Jackson Park into the White City while Holmes used the attraction of the great fair and his own satanic charms to lure scores of young women to their deaths. What makes the story all the more chilling is that Holmes really lived walking the grounds of that dream city by the lake. *The Devil in the White City* draws the reader into the enchantment of the Gilded Age made all the more appealing by a supporting cast of real life characters including Buffalo Bill Theodore Dreiser Susan B. Anthony Thomas Edison Archduke Francis Ferdinand and others. Erik Larson's gifts as a storyteller are magnificently displayed in this rich narrative of the master builder the killer and the great fair that obsessed them both.

Cartographies of Exile Karen Elizabeth Bishop, 2016-04-20 This book proposes a fundamental relationship between exile and mapping. It seeks to understand the cartographic imperative inherent in the exilic condition the exilic impulses fundamental to mapping and the varied forms of description proper to both. The vital intimacy of the relationship between exile and mapping compels a new spatial literacy that requires the cultivation of localized dynamic reading practices attuned to the complexities of understanding space as text and texts as spatial artifacts. The collection asks what kinds of maps do exiles make. How are they conceived drawn read. Are they private maps or can they be shaped collectively. What is their relationship to memory and history. How do maps provide for new ways of imagining the fractured experience of exile and offer up both new strategies for reading displacement and new displaced reading strategies. Where does exilic mapping fit into a history of cartography particularly within the twentieth century spatial turn. The original work that makes up this interdisciplinary collection presents a varied look at cartographic strategies employed in writing art and film from the pre-Contact Americas to the Renaissance to late

postmodernism the effects of exile in its many manifestations on cartographic textual systems ways of seeing and forms of reading the challenges of traversing and mapping unstable landscapes and restrictive social and political networks and the felicities and difficulties of both giving into the map and attempting to escape the map that provides for exile in the first place Cartographies of Exile will be of interest to students and scholars working in literary and cultural studies gender sexuality and race studies anthropology art history and architecture film performance visual studies and the fine arts

The Incorporation of America Alan Trachtenberg, Eric Foner, 1982 Alan Trachtenberg presents a balanced analysis of the expansion of capitalist power in the last third of the nineteenth century and the cultural changes it brought in its wake In America's westward expansion labor unrest newly powerful cities and newly mechanized industries the ideals and ideas by which Americans lived were reshaped and American society became more structured with an entrenched middle class and a powerful business elite This is a brilliant essential work on the origins of America's corporate culture and the formation of the American social fabric after the Civil War

From the Steel City to the White City Zachary L. Brodt, 2023-11-21 In *From the Steel City to the White City* Zachary Brodt explores Western Pennsylvania's representation at Chicago's Columbian Exposition the first major step in demonstrating that Pittsburgh was more than simply America's crucible it was also a region of developing culture and innovation The 1893 Columbian Exposition presented a chance for the United States to prove to the world that it was an industrial giant ready to become a global superpower At the same time Pittsburgh a commercial center that formerly served as a starting point for western expansion found itself serving as a major transportation and increasingly industrial hub during this period of extensive growth Natural resources like petroleum and coal allowed Western Pennsylvania to become one of the largest iron and steel producing regions in the world The Chicago fairgrounds provided a lucrative opportunity for area companies not only to provide construction materials but to display the region's many products While Pittsburgh's most famous contributions to the 1893 World's Fair alternating current electricity and the Ferris wheel had a lasting impact on the United States and the world other exhibits provided a snapshot of the area's industries natural resources and inventions The success of these exhibits Brodt reveals launched local companies into the twentieth century ensuring a steady flow of work money and prestige

The Body in the Anglosphere, 1880-1920 Robert W. Thurston, 2021-12-30 Focusing on the body in every chapter this book examines the changing meanings and profound significance of the physical form among the Anglo Saxons from 1880 to 1920 They formed an imaginary but in many ways quite real community that ruled much of the world Among them racism became more virulent To probe the importance of the body this book brings together for the first time the many areas in which the physical form was newly or more extensively featured from photography through literature frontier wars violent sports and the global circus Sex sexuality concepts of gender including women's possibilities in all areas of life and the meanings of race and of civilization figured regularly in Anglo discussions Black people challenged racism by presenting their own photos of respectable folk As all this unfolded

Anglo men and women faced the problem of maintaining civilized control vs the need to express uninhibited feeling. With these issues in mind, it is evident that the origins of today's debates about race and gender lie in the late nineteenth century.

American Endurance Richard A. Serrano, 2016-10-04 Pulitzer Prize winning journalist and author Richard A. Serrano's new book *American Endurance* Buffalo Bill the Great Cowboy Race of 1893 and the Vanishing Wild West is history, mystery and Western all rolled into one. In June 1893 nine cowboys raced across a thousand miles of American prairie to the Chicago World's Fair. For two weeks they thundered past angry sheriffs, governors and Humane Society inspectors intent on halting their race. Waiting for them at the finish line was Buffalo Bill Cody who had set up his Wild West Show right next to the World's Fair that had refused to allow his exhibition at the fair. The Great Cowboy Race occurred at a pivotal moment in our nation's history: many believed the frontier was settled and the West was no more. The Chicago World's Fair represented the triumph of modernity and the end of the cowboy age. Except no one told the cowboys. Racing toward Buffalo Bill Cody and the gold plated Colt revolver he promised to the first to reach his arena, nine men went on a Wild West stampede from tiny Chadron, Nebraska to bustling Chicago. But at the first thud of hooves pounding on Chicago's brick pavement, the race devolved into chaos. Some of the cowboys shipped their horses part of the way by rail or hired private buggies. One had the unfair advantage of having helped plan the route map in the first place. It took three days, numerous allegations and a good old Western showdown to sort out who was first to Chicago and who won the Great Cowboy Race. Mariana Griswold Van Rensselaer Judith K. Major, 2013-04-23 Mariana Griswold Van Rensselaer 1851-1934 was one of the premier figures in landscape writing and design at the turn of the twentieth century, a moment when the amateur pursuit of gardening and the increasingly professionalized landscape design field were beginning to diverge. This intellectual biography, the first in-depth study of the versatile critic and author, reveals Van Rensselaer's vital role in this moment in the history of landscape architecture. Van Rensselaer was one of the new breed of American art and architecture critics, closely examining the nature of her profession and bringing a disciplined scholarship to the craft. She considered herself a professional, leading the effort among women in the Gilded Age to claim the titles of artist, architect, critic, historian, and journalist. Thanks to the resources of her wealthy mercantile family, she had been given a sophisticated European education almost unheard of for a woman of her time. Her close relationship with Frederick Law Olmsted influenced her ideas on landscape gardening, and her interest in botany and geology shaped the ideas upon which her philosophy and art criticism were based. She also studied the works of Charles Darwin, Alexander von Humboldt, Henry David Thoreau, and many other nineteenth-century scientists and nature writers, which influenced her general belief in the relationship between science and the imagination. Her cosmopolitan education and elevated social status gave her much like her contemporary Edith Wharton access to the homes and gardens of the upper classes. This allowed her to mingle with authors, artists, and affluent patrons of the arts and enabled her to write with familiarity about architecture and landscape design. Identifying over 330 previously unattributed editorials and unsigned

articles authored by Van Rensselaer in the influential journal *Garden and Forest* for which she was the sole female editorial voice Judith Major offers insight into her ideas about the importance of botanical nomenclature the similarities between landscape gardening and idealist painting design in nature and many other significant topics Major's critical examination of Van Rensselaer's life and writings which also includes selections from her correspondence details not only her influential role in the creation of landscape architecture as a discipline but also her contribution to a broader public understanding of the arts in America
