World James Hancock, James A. Kushlan, M. Philip Kahl, 2010-09-30 Everything you ever wanted to know about storks, ibises and spoonbills. Some of the world's largest and most spectacular birds are to be found among this group of wading birds. Tragically they also include many of the world's most endangered species as changes in land use erode their wetland habitats. Some like the White Stork have lived alongside humans for hundreds of years and are well known from numerous studies. Others like the Storm's stork and ibises of West Africa, South East Asia and South America live so secluded a life in the remote corners of the globe that they will probably be extinct before even the most basic details of their biology are known. In this monograph three authors and two artists have combined their skills to capture what is known of this group of wading birds. The text opens with general chapters on taxonomy and feeding, breeding and behaviour followed by detailed coverage of each species. Ruschenberger's Series. First Books of Natural History. Elements of Anatomy and Physiology (of

Mammalogy ... Ornithology ... Herpetology ... Ichthyology ... Geology.) ... From the Text of Milne Edwards and A. Comte. With Plates William Samuel Waithman RUSCHENBERGER, 1845 *Social-Ecological Restoration in Paddy-Dominated Landscapes*

Nisikawa Usio, Tadashi Miyashita, 2015-01-20 With a focus on environmentally friendly rice farming, this unique book integrates both ecosystem and human dimensions of ecological restoration to provide strategies to promote sustainable agriculture and rural development. Paddy fields have multiple functions beyond their role of producing rice. They serve as refuge habitats for a range of wildlife that once inhabited floodplain wetlands and contain a number of unique and threatened aquatic species. They also provide various ecosystem services for regional communities such as water retention, erosion control, flood control, fish culture and educational opportunities. However, rice paddies are threatened worldwide due to the modernization of agriculture and abandonment of farmland caused by depopulation and the aging of rural communities. Therefore, multiple ecological and sociological aspects must be considered in the ecological restoration of paddy fields. This

book aims to do so by incorporating various disciplines of natural and social sciences Strategies for sustainable agriculture are reviewed including financial incentives for farmers and the use of flagship wildlife species such as the crested ibis to promote ecological restoration With the increasing popularity of environmentally friendly rice farming in parts of Asia and the western United States this book offers model cases for sustainable management of paddy dominated landscapes
