Young People and Long-Term Unemployment Marco Giugni, Jasmine Lorenzini, Manlio Cinalli, Christian Lahusen, Simone Baglioni, 2020-12-30 Young People and Long Term Unemployment examines the consequences of long term unemployment for the personal social and political lives of young adults aged 18 34 across four European cities Cologne Germany Geneva Switzerland Lyon France and Turin Italy Adopting a multidimensional theoretical framework aiming to bring together insights based on the contextual macro organizational meso and individual micro levels and combining quantitative and qualitative data and analyses it reaches a number of important conclusions First our study shows that the experience of long term unemployment has a negative impact on different dimensions of young people s lives When compared to employed youth unemployed youth are less satisfied with their lives more isolated and less independent financially Second however there are important variations across the four cities This means that in spite of widespread retrenchments in some places the welfare state still acts as a buffer against unemployment Third although young unemployed people participate in politics equally if not slightly more than employed youth the young unemployed are often disconnected from politics This is so even when they have important grievances to express in the face of high youth unemployment precarious working conditions and grim future perspectives on the labor market This book will be useful for scholars interested in unemployment politics and youth politics researchers and teachers in political science sociology and social psychology

The Consequences of Long Term Unemployment Katharine G. Abraham, John C. Haltiwanger, Kristin Sandusky, James Spletzer, 2016 Abstract It is well known that the long term unemployed fare worse in the labor market than the short term unemployed but less clear why this is so One potential explanation is that

the long term unemployed are bad apples who had poorer prospects from the outset of their spells heterogeneity Another is that these bad outcomes are a consequence of their extended unemployment state dependence We use Current Population Survey data on unemployed individuals linked to wage records for the same people to distinguish between these explanations The rich information on work histories provided by the wage records allows us to control for individual heterogeneity that could be affecting post unemployment labor market outcomes Even with these controls in place we find that unemployment duration has a strongly negative effect on the likelihood of subsequent employment This finding is inconsistent with the bad apple heterogeneity explanation for why the long term unemployed fare worse than the short term unemployed We also find that longer unemployment durations are associated with lower subsequent earnings though this is mainly attributable to the long term unemployed having a lower likelihood of subsequent employment rather than to their having lower earnings once a job is found The Psychological and Social Consequences of Unemployment ,1987 **Combating Long-Term**

Unemployment Kenneth Dyson,2023-10-20 First published in 1989 Combating Long Term Unemployment follows on from and is a companion to Local Authorities and New Technologies The book seeks to inform debate by analysing policy responses to the problem of long term unemployment and by focusing on the role of local initiatives in a European context Long term unemployment in Europe is a complicated and multifaceted problem the policy responses to which need to be studied against various contexts It is designed to appeal to all those interested in policies to combat long term unemployment local and central government officials private sector organizations whose work is relevant to locally based initiatives and interested academics **Long-term Unemployment in the 1960's** Susan S. Long-Term Unemployment Katharine G. Abraham,2016 It is well known that the long term unemployed fare worse in the labor market than the short term unemployed but less clear why this is so One potential explanation is that the long term unemployed are bad apples who had poorer prospects from the outset of their spells heterogeneity Another is that their bad outcomes are a consequence of the extended unemployment they have experienced state dependence We use Current Population Survey CPS data on unemployed individuals linked to wage records for the same people to distinguish between these competing explanations For each person in our sample we have wage record data that cover the period from 20 quarters before to 11 quarters after the quarter in which the person is observed in the CPS This gives us rich information about prior and subsequent work histories not available to previous researchers that we use to control for individual heterogeneity that might be affecting subsequent labor market outcomes Even with these controls in place we find that unemployment duration has a strongly negative effect on the likelihood of subsequent employment This result is robust to efforts to account for differences in labor market circumstances that might affect job finding success rates The findings are inconsistent with the heterogeneity bad apple explanation for why the long term unemployed fare worse than the short term unemployed and lend support to the state dependence explanation for the negative association between unemployment

duration and subsequent employment rates We also find that longer unemployment durations are associated with lower subsequent earnings though this is mainly attributable to the long term unemployed having a lower likelihood of subsequent employment rather than to their having lower earnings once a job is found *The Unemployment Trap* Mateo Alaluf,1992 This report defines the social exclusion process by examining long term unemployment and educational deficiencies in Europe and assessing the scope and effectiveness of the steps taken by the governments concerned to deal with the problem Chapter I looks at education and prolonged unemployment in six countries that reflect the range of European experience Belgium France Portugal Spain Sweden and the United Kingdom Chapter II considers the countries individually from the point of view both of the extent of long term unemployment and of the steps taken to limit its effects Chapter III outlines the main features of long term unemployment while chapter IV reviews the types of measures introduced in the different countries and assesses the impact of national policies Chapter V looks at the problems associated with lack of education and training and with illiteracy chapter VI sets the problems in the context of the labor market and chapter VII in that of economic policy options The final chapter discusses the relationship between educational deficiencies and long term unemployment The aim is to identify both the ways in which social exclusion operates and the role of public policy in this area Contains 50 references YLB **Long-term Unemployment** Child Poverty Action Group,1978* **Economics of the Labour Market** P. N. (Raja) Junankar,2016-01-12 The global crisis has led to dramatic increases in unemployment rates over most of the countries of the OECD This book provides alternative explanations of this phenomenon Junankar begins with surveys of the labour market labour demand labour supply and labour force participation He argues that the growth of unemployment and long term unemployment is mainly due to a lack of aggregated demand and not due to high unemployment benefits Economics of the Labour Market shows that unemployment and long term unemployment impose serious and significant costs on individuals families and society in general Raja Junankar focuses on vital social issues arising from the malfunctioning of economies and this collection of essays tackles the real cost of unemployment
