The Origins of Development Economics Jomo Kwame Sundaram,Erik S. Reinert,2005-09 A history of the emergence of development economics as a distinct sub discipline *The Global Economic Crisis* Emiliano Brancaccio,Giuseppe Fontana,2013-03-01

Why did the economists of the so called mainstream seem to fail to foresee the global economic crisis that exploded in 2008 And why do they appear to have difficulty in putting forward an interpretation of it that is consistent with the theoretical foundations of their models These two questions have echoed insistently since the outbreak of the crisis not only in academic circles but also in the mass media and appear to reflect increasingly widespread dissatisfaction with the dominant paradigm of economic theory Many believe that the global recession now underway may constitute an historic watershed for the evolution of economics and therefore that an authentic change of paradigm is called for rather than only minor adjustments to the dominant approach Since the start of the crisis there has indeed been a profusion of contributions from alternative

areas of economic study and in particular from those adopting a critical stance with respect to mainstream economic theory. This collection puts forward promising reinterpretations of the primary schools of heterodox political economy, stringent critiques of the conventional readings of the recession, new schemes of theoretical and empirical analysis of the crisis and proposals for economic policies alternative to those hitherto adopted. This book contains a selection of some of the most recent contributions to the critique of mainstream economic theory and policy and discusses the origins and possible evolutions of the current economic crisis. The collection should be of interest to students and researchers focussing on macroeconomics, monetary economics, political economy and financial economics. *The Other Canon of Economics, Volume 1* Erik Reinert, 2024-02-13. Other Canon Economics: Essays in the Theory and History of Uneven Economic Development brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today. Erik S. Reinert argues through essays ranging from 1994 to 2020 that neo-classical economics damages developing countries: the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth. Based on a long intellectual tradition started by the Italian economists Giovanni Botero (1589) and Antonio Serra (1613) and later used in virtually all presently industrialised countries, Reinert shows that the country which exports increasing returns goods (e.g. high end manufacture) has advantages over the country which exports diminishing returns goods (e.g. commodities). This has important implications for today's development strategies that Reinert argues should be seen as industrial strategies. Mercantilism, Account Keeping and the Periphery-Core Relationship Cheryl Susan McWatters, 2018-07-11. Mercantilism and accounting remain two dynamic and debated concepts in terms of definition and scope. This volume brings together the research of international scholars from a wide variety of disciplines: accounting, anthropology, native studies, economic geography, economic history and management to reflect on alternative approaches to the study of these concepts. This book focuses particularly on how individuals across space and time negotiated and navigated systems of exchange and trade, especially when confronted with world views and cultural systems that conflicted with and disrupted perceptions of their own. Through this the volume offers a helpful reinforcement to the view that the analysis of mercantilism must be more highly contextualised to time and place along with deeper focus on the local actors involved. It is these local actors who negotiated, exchanged and navigated differing world views and who enable us to tease out the longer run global economic and social processes and the impacts of these encounters. Complementing the growing interest in mercantilism, Indigenous studies and the relationships between colonists, traders and their counterparts in colonies and trading ports, this work provides a cross-disciplinary examination of the subject area. Furthermore, it encourages a renewed interest in the use of archival documents and documentary sources in novel and innovative ways.
