Planning In Defense:

U.S. Defense Planning John M Collins, 2019-07-25 Superior defense plans fuse political economic military technological and sociological power in ways that cover state interests while conserving resources to the greatest prudent extent Poor products can increase costs without reducing risks because forces and funds that support slipshod schemes often fail to furnish security This critical appraisal of the U S defense planning system seeks to serve a five fold purpose set assessment standards appraise U S planning in principle appraise U S planning in practice identify U S planning problems and present optional courses of corrective action The study shows how domestic and foreign policy inputs from the White House National Security Council and State Department affect defense planning

Defence Planning as Strategic Fact Henrik

Breitenbauch, André Ken Jakobsson, 2020-06-04 Defence Planning as Strategic Fact provides and elaborates on an upstream focus on the variegated organizational political and conceptual practices of military civilian administrative and political leaderships involved in defence planning offering an important security and strategic studies supplement to the traditional downstream focus on the use of force The book enables the reader to engage with the role of ideas in defence planning of organizational processes and biases path dependencies and administrative dynamics under the pressures of continuously changing domestic and international constraints The chapters show how defence planning must be seen as a constitutive element of defence and strategic studies that it is a strategic fact of its own which merits particular practical and scholarly attention As defence planning creates the conditions behind every peace upheld or broken and every war won or lost Defence Planning as Strategic Fact will be of great use to scholars of defence studies strategic studies and military studies This book was originally published as a special issue of Defence Studies

U.S. Department of Defense Strategic Planning Douglas C.

Lovelace, 1995 The authors define a formal strategic plan one that contains specific strategic objectives offers a clear and executable strategy for achieving objectives illuminates force capability requirements and is harmonized with the Future Years Defense Program They discuss the reasons why a strategic plan is needed and the value it would have in coherently connecting the guidance provided by the National Command Authorities to the integrated activities of the unified commands the Services and other components of DoD They conclude by examining three alternatives to improve the strategic planning processes and to facilitate efficient development of strategic plans They settle on a set of recommendations that they believe would comprehensively link the major elements of current strategic planning albeit modified in some cases and establish a clearer military foundation for DoD resource decisions

The U.S. Department of Defense's Planning Process Michael

J. Mazarr, Katharina Ley Best, Burgess Laird, Eric Victor Larson, Michael E. Linick, Dan Madden, 2019 This report describes the current defense planning process used by the U S Department of Defense with a focus on how scenarios are developed and employed to support defense planning

Defense Planning and Budgeting United States. General Accounting Office, 1991

A Framework for Defense Planning Glenn A. Kent, 1989 This report presents an approach to strengthening the U S

defense planning process The approach centers on a simple but rigorous framework that links official statements of national security and national military strategy and the operational capabilities of force elements to programs for developing and procuring military systems and services The author recommends adopting a force planning procedure that includes the following elements 1 an operational focus 2 guidance to Department of Defense components in operational terms 3 discussion at the level of force elements rather than systems and hardware 4 outlines of capability goals 5 allocation of resources to best overall effect 6 a better process for decisionmaking 7 streamlined process for upgrading basic systems 8 determination of performance features of new basic systems and 9 reduction of turmoil and paralysis *Threat Assessment, Military Strategy, and Defense Planning* United States. Congress. Senate. Committee on Armed Services,1992

Framework for Defense Planning Rand Corporation,1989 *Defense Resource Planning Under Uncertainty* Robert J. Lempert,Drake Warren,Ryan Henry,Robert W. Button,Jonathan Klenk,Kate Giglio,2016-01-29 Defense planning faces significant uncertainties This report applies robust decision making RDM to the munitions mix challenge to demonstrate how RDM could help defense planners make plans more robust to a wide range of hard to predict futures Defense Planning in a Decade of Change Eric Victor Larson,David T. Orletsky,Kristin J Leuschner,Kristin Leuschner,2001 The end of the Cold War ushered in an era of profound change in the international arena and hence in the policymaking environment as well Yet the changes that have characterized the post Cold War era have often proceeded at different paces and have at times moved in opposing directions placing unprecedented strain on policymakers seeking to shape a new national security and military strategy This report describes the challenges policymakers have faced as seen through the lens of the three major force structure reviews that have taken place over the past decade the 1990 Base Force the 1993 Bottom Up Review and the 1997 Quadrennial Defense Review The report focuses on the assumptions decisions and outcomes associated with these reviews as well as the planning and execution of each It concludes that all three reviews fell short of fully apprehending the demands of the emerging threat environment and the budgets that would be needed and afforded resulting in a growing imbalance between strategy forces and resources over the decade Accordingly the report recommends that future defense planners adopt an assumption based approach in which key planning assumptions are continually reassessed with a view toward recognizing and rapidly responding to emerging gaps and shortfalls U.S. Department of Defense Strategic Planning: The Missing Nexus ,1995 This is the pilot in a series of reports on strategic planning conducted within the U S Department of Defense It focuses on the strategic planning responsibilities of the Chairman of the Joint Chiefs of Staff because planning at that level provides the critical nexus between the strategic direction provided by the National Command Authorities and its implementation by the unified combatant commands and military departments The authors thorough understanding of the statutory requirements for strategic planning and the interactions between the Chairman s complex strategic planning process and other key DOD planning systems enables them to explicate today s strategic planning challenges and offer

insightful recommendations Strategic planning in the post Cold War era has proven to be exceptionally problematic The plethora of national and international tensions that the east west confrontation of the Cold War in large measure subdued combine now to create a world replete with diverse challenges to U S interests Equally disturbing is the fact that these challenges are not as clearly defined and easily articulated as was the monolithic Soviet threat The authors point out that the Cold War provided inherent stability in U S strategic planning and that the basic elements of a strategic military plan evolved over time They go on to argue that the elimination of the National Military Strategy Document and the abandonment of the Base Case Global Family of Operation Plans amounted to recision of the Chairman s strategic plan and that nothing has been developed to take its place

Military Planning in the Twentieth Century Mary Ann Robinson,1984 The essays commentaries and speeches which form this volume were presented at the Eleventh Military History Symposium held at the United States Air Force Academy on 10 12 October 1984 This conference is a biennial event sponsored jointly by the Department of History and the Association of Graduates of the United States Air Force Academy Begun in 1967 the series seeks to address problems in military history which have received limited attention and to provide a forum in which scholars may present the results of their research In this manner we hope to stimulate and encourage interest in military history among civilian and military scholars members of the armed forces and the cadets of the United States Air Force Academy

Defense Planning for National Security Strategic Studies Strategic Studies Institute,U. S. Army U.S. Army War College Press,2014-12-29 The purpose of this book is to explore and examine the challenge to America s defense planners of needing to make purposeful and prudent choices in military preparation for the future The problem for defense planning that is beyond resolution is the scientifically certain fact that we have no data from the future about the future Moreover this will always be a fact No matter the scholarly discipline and tradition to which a defense planner owes or feels most allegiance he or she needs to recognize and attempt to understand fully a personal and institutional condition of awesome ignorance of detail about the future Further study more cunning analytical methodology even more powerful computers none of these can reveal with any certainty what the future will bring Fortunately this does not mean that we are ignorant about the future but it does mean that defense planning is guesswork and can only be such Understandably both senior policymakers and soldiers tend to be reluctant even to the point of appearing to be evasive when legislators question the plausibility of the answers given in congressional hearings After all it can be troubling to the conscience of honest and competent people to be obliged to affirm the integrity of choices made in defense preparation for national security in years to come when there is and can be no certain way to know that one is sufficiently correct

Planning America's Security; Lessons from the National Defense Panel ,1999 This report reviews recent longer term U S defense planning attempts focusing especially on the NDP The NDP was established as an independent effort to provide guidance to the Secretary of Defense and the Congress on matters pertaining to the long term national security of the United States This report reviews the motivations for creating the

NDP the NDP's relationship to the QDR the NDP's administrative and logistical experience and the substantive results the NDP published in its final report We conclude by discussing in depth some of the lessons learned from the first NDP experience and distilling recommendations for the Congress the administration the Department of Defense DoD and future NDP management teams The substantive recommendations of the NDP report were initially overshadowed by other events that dominated the news headlines in late 1997 and early 1998 most notably the crisis with Iraq Nevertheless the report was sufficiently pointed to generate considerable interest and not a little controversy within the defense and national security communities Of particular interest was the report's focus on the need for the DoD to accelerate its reform efforts the NDP called this a transformation strategy to better position itself to meet the numerous new and unpredictable challenges of the next 20 years

Strategy and Defence Planning Colin S. Gray, 2014-06-26 Strategy and Defence Planning Meeting the Challenge of Uncertainty explores and examines why and how security communities prepare purposefully for their future defence The author explains that defence planning is the product of interplay among political process historical experience and the logic of strategy The theory of strategy best reveals both the nature and the working of defence planning Political ends strategic ways and military means all fed by reigning if not always recognized assumptions organize the subject well with a template that can serve any time place and circumstance The book is designed to help understanding of what can appear to be a forbiddingly complex as well as technical subject A good part of the problem for officials charged with defence planning duties is expressed in the second part of the book's title The real difficulty which rarely is admitted by those tasked with defence planning duty is that defence planning can only be guesswork But because defence preparation is always expensive not untypically is politically unpopular yet obviously can be supremely important claims to knowledge about the truly unknowable persist In truth we cannot do defence planning competently because our ignorance of the future precludes understanding of what our society will be shown by future events to need The challenge faced by the author was to identify ways in which our problems with the inability to know the future in any detail in advance the laws of nature in other words may best be met and mitigated Professor Gray argues that our understanding of human nature of politics and of strategic history does allow us to make prudent choices in defence planning that hopefully will prove good enough

Defense Planning for National Security Colin S. Gray, Strategic Studies Institute, U. S. Army War College Press, 2014-03-19 The challenge that is defense planning includes educated futurology and the humanities as methodological approaches futurists and scenarios trend spotting and defense analysis the impossibility of science in studying the future the impossibility of verification by empirical testing of hypotheses the value of the humanities which are politics strategy and history for defense planning the use and misuse of analogy learning from history why and how strategic history works and recommendations for the Army What can be learned from history and what cannot are discussed in this analysis
