Ketchum,2012-10 Chemical warfare watchers from scientists to policy advocates often wonder what went on at the Army Chemical Center during the 1960s It was a decade in which thousands of Army enlisted men served as volunteers for the secret testing of chemical agents The actual historical record however has until now remained disturbingly incomplete What chemicals was the Army studying Why was the program never fully documented in books available to the public Who planned and carried out the tests and what was their purpose How and by whom were the volunteers recruited How adequately were they instructed before giving their informed consent What long range effects if any have been found in follow up studies Written by the physician who played a pivotal role in psychoactive drug testing of hundreds of volunteers the story breaks an official silence that has lasted almost fifty years Dr James Ketchum may be the only scientist still equal to the task His book goes a long way toward revealing the contents of once classified documents that still reside in restricted archives The author spent most of a decade testing over a dozen potential incapacitating agents including LSD BZ and marijuana derivatives His 380 page narrative loaded with both old and recent photographs derives from technical reports memoranda films notes and memories Written primarily for the general reader

but supplemented by a voluminous appendix of graphs and tables for the technically inclined Dr Ketchum's book combines a subjective diary with an objective report of the external events that shaped and eventually terminated the program Informal and autobiographical in style it includes numerous amusing anecdotes and personality portraits that make it simultaneously intriguing and informative [Air University Library Index to Military Periodicals](#) ,1974 *Armor* ,1974 **Hearings** United States.
