Gilberto Artioli, 2010-07-08 Scientific techniques developed in materials science offer invaluable information to archaeology art history and conservation A rapidly growing number of innovative methods as well as many established techniques are constantly being improved and optimised for the analysis of cultural heritage materials The result is that on the one hand more complex problems and questions can be confronted but on the other hand the required level of technical competence is widening the existing cultural gap between scientists and end users such as archaeologists museum curators art historians and many managers of cultural heritage who have a purely humanistic background The book is intended as an entry level introduction to the methods and rationales of scientific investigation of cultural heritage materials with emphasis placed on the analytical strategies modes of operation and resulting information rather than on technicalities The extensive and updated reference list should be a useful starting point for further reading Students and researchers from the humanities approaching scientific investigations should find it useful as well as scientists applying familiar techniques and methods to unfamiliar problems related to cultural heritage [Forensic Document Examination in the 21st Century](#)

Miriam Angel, Jan Seaman Kelly, 2020-12-21 Forensic Document Examination in the 21st Century covers the latest technology and techniques providing a complete resource on contemporary issues and methods in forensic document examination Forensic document examiners provide their findings as expert testimony in court Due to rapid changes in technology including digital documents printing and photocopying capabilities and more there is a great need for this up to date reference The examination of documents can include comparison of handwriting or hand printing detection of alterations or photocopier and computer manipulation restoration or decipherment of erased and obliterated writing visualization of latent impressions the

identification of printing processes and differentiation of inks Computer generated documents are prevalent and electronically captured signatures are becoming more widespread meaning the knowledge of advances in technology and adoption of new validated techniques and methods of document examination are crucial to the reliability of forensic opinions Forensic Document Examination in the 21st Century includes the latest research on the subject and with contributions from leading experts on their various areas of expertise The book will be a welcome addition to the literature and support the foundational basis for methods and procedures for use it expert testimony in court serving as a resource for forensic document examiners trainees and those in the criminal and legal communities who use the services of expert document examiners and witnesses

The Explicit Material Hanna B. Hölling, Francesca G. Bewer, Katharina Ammann, 2019-05-20 The Explicit Material gathers varied perspectives from the discourses of conservation curation and humanities disciplines to focus on aspects of heritage transmission and material transitions The authors observe and explicate the myriad transformations that works of different kinds manuscripts archaeological artefacts video art installations performances film and built heritage may undergo changing contexts changing matter changing interpretations and display Focusing on the vibrant materiality of artworks and artefacts The Explicit Material puts an emphasis on objects as complex constructs of material relations By so doing it announces a shift in sensibilities and understandings of the significance of objects and the materials they are made of and on the increasingly blurred boundaries between the practices of conservation and curation
