about four billion years ago on our planet Like an old patchwork quilt evolution stitched the human being together from parts of ancient species now long extinct Like any species humans have hundreds or even thousands of traits that have been passed down through time The evolutionary age of our different traits can be told from how widely distributed they are among today s living creatures The book aims to explain some human traits and how we as social sexual language obsessed technological apes evolved into our own modern species Combining hard science with philosophical thought this work aims to explain where humans have come from and where we are going Free of complicated jargon it breaks down the concept of evolution starting with the human body s most basic component our cells Building from there chapters explore which traits became inherited over evolutionary time ultimately projecting what could be next for our species     *Your Inner Fish* Neil Shubin,2009-01-06 The paleontologist and professor of anatomy who co discovered Tiktaalik the fish with hands tells a compelling scientific adventure story that will change forever how you understand what it means to be human Oliver Sacks By examining fossils and DNA he shows us that our hands actually resemble fish fins our heads are organized like long extinct jawless fish and major parts of our genomes look and function like those of worms and bacteria Your Inner Fish makes us look at ourselves and our world in an illuminating new light This is science writing at its finest enlightening accessible and told with irresistible enthusiasm     **American Inventor** ,1902     **The Battle for the Beginning** John F.

MacArthur,2005-03-20 The battle lines have been drawn Is the enemy winning Thanks to the theory of evolution writes best selling author John MacArthur naturalism is now the dominant religion of modern society Less than a century and a half ago Charles Darwin popularized the credo for this secular religion Naturalism has now replaced Christianity as the main religion of the Western world and evolution has become its principal dogma Many Christians who claim to believe that the Bible is God s revealed truth seem willing to allow modern scientific theories to replace the Genesis account of creation Such compromises present a conspicuous danger Bible teacher and pastor John MacArthur believes that in Genesis 1 3 we find the foundation of every doctrine that is essential to the Christian faith the vital underpinnings for everything we believe The Battle for the Beginning draws a clear line on today s theological landscape Everything in Scripture that teaches about sin and redemption assumes the literal truth of the first three chapters of Genesis If we wobble to any degree on the truth of this passage John MacArthur insists we undermine the very foundations of our faith
