Sea Clocks The Story Of Longitude:

Sea Clocks Louise Borden, 2007 This is the story of John Harrison an Englishman who worked timelessly for more than forty years to create a perfect sea clock The Illustrated Longitude Dava Sobel, William J. H. Andrewes, 1998 In addition to the text of Longitude this edition also contains over 200 illustrations biographical articles on the major characters additional boxed information on the important scientific nautical historical and artistic events of the day time lines and diagrams to explain geographical horological and astronomical aspects of longitude **Ships, Clocks, and Stars** Richard Dunn, Rebekah Higgitt, 2014-11-04 An illustrated history of an eighteenth century British act of parliament and the heated race to find a ship's precise longitude at sea A tale of eighteenth century invention and competition commerce and conflict this is a lively illustrated and accurate chronicle of the search to solve the longitude problem the question of how to determine a ship's position at sea and one that changed the history of mankind Ships Clocks and Stars brings into focus one of our greatest scientific stories the search to accurately measure a ship's position at sea The incredible illustrated volume reveals why longitude mattered to seafaring nations illuminates the various solutions that were proposed and tested and explores the invention that revolutionized human history and the man behind it John Harrison Here too are the voyages of Captain Cook that put these revolutionary navigational methods to the test Filled with astronomers inventors politicians seamen and satirists Ships Clocks and Stars explores the scientific political and commercial battles of the age as well as the sailors ships and voyages that made it legend from Matthew Flinders and George Vancouver to the voyages of the Bounty and the Beagle Featuring more than 150 photographs specially commissioned from Britain's National Maritime Museum this evocative detailed and thoroughly fascinating history brings this age of exploration and enlightenment vividly to life

Illustrated Longitude Dava Sobel, William J. H. Andrewes, 2003 A fully illustrated edition of the international best seller Longitude The Illustrated Longitude recounts in words and images the epic quest to solve the greatest scientific problem of the eighteenth and three prior centuries determining how a captain could pinpoint his ship's location at sea All too often throughout the ages of exploration voyages ended in disaster when crew and cargo were either lost at sea or destroyed upon the rocks of an unexpected landfall Thousands of lives and the fortunes of nations hung on a resolution to the longitude problem To encourage a solution governments established prizes for anyone whose method or device proved successful The largest reward of 20 000 truly a king's ransom was offered by Britain's Parliament in 1714 The scientific establishment from Galileo to Sir Isaac Newton had been certain that a celestial answer would be found and invested untold effort in this pursuit By contrast John Harrison imagined and built the unimaginable a clock that told perfect time at sea known today as the chronometer Harrison's trials and tribulations during his forty year quest to win the prize are the culmination of this remarkable story The Illustrated Longitude brings a new and important dimension to Dava Sobel's celebrated story It contains the entire original narrative of Longitude redesigned to accompany 183 images chosen by William Andrewes from

portraits of every important figure in the story to maps and diagrams scientific instruments and John Harrison's remarkable sea clocks themselves Andrewes's elegant captions and sidebars on scientific and historical events tell their own story of longitude paralleling and illuminating Sobel's memorable tale *The Story of Science: Newton at the Center* Joy Hakim, 2016-04-26 In volume two students will watch as Copernicus's systematic observations place the sun at the center of our universe to the dismay of establishment thinkers After students follow the achievements and frustrations of Galileo Kepler and Descartes they will appreciate the amazing Isaac Newton whose discoveries about gravity motion colors calculus and Earth's place in the universe set the stage for modern physics astronomy mathematics and chemistry In the three book *The Story of Science* series master storyteller Joy Hakim narrates the evolution of scientific thought from ancient times to the present With lively character driven narrative Hakim spotlights the achievements of some of the world's greatest scientists and encourages a similar spirit of inquiry in readers The books include hundreds of color photographs charts maps and diagrams informative sidebars suggestions for further reading and excerpts from the writings of great scientists
