Animal Weapons Douglas J. Emlen, 2014-11-11 WINNER OF THE PHI BETA KAPPA AWARD IN SCIENCE The story behind the stunning extreme weapons we see in the animal world teeth and horns and claws and what they can tell us about the way humans develop and use arms and other weapons In *Animal Weapons* Doug Emlen takes us outside the lab and deep into the forests and jungles where he's been studying animal weapons in nature for years to explain the processes behind the most intriguing and curious examples of extreme animal weapons fish with mouths larger than their bodies and bugs whose heads are so packed with muscle they don't have room for eyes As singular and strange as some of the weapons we encounter on these pages are we learn that similar factors set their evolution in motion Emlen uses these patterns to draw parallels to the way we humans develop and employ our own weapons and have since battle began He looks at everything from our armor and camouflage to the evolution of the rifle and the structures human populations have built across different regions and eras to protect their homes and communities With stunning black and white drawings and gorgeous color illustrations of these concepts at work *Animal Weapons* brings us the complete story of how weapons reach their most outsized dramatic potential and what the results we witness in the animal world can tell us about our own relationship with weapons of all kinds **Anti-Submarine Warfare** David Owen, 2007-11-15 A deep dive into the tactics and technology used to defend against submarines from the opening of the First World War through World War II and beyond The submarine was undoubtedly the most potent purely naval weapon of the twentieth century In two world wars enemy underwater campaigns were very nearly successful in thwarting Allied hopes of victory indeed annihilation of Japanese shipping by US Navy

submarines is an indicator of what might have been That the submarine was usually defeated is a hugely important story in naval history yet this is the first book to treat the subject as a whole in a readable and accessible manner It concerns individual heroism and devotion to duty but also ingenuity technical advances and originality of tactical thought What developed was an endless battle between forces above and below the surface where a successful innovation by one side eventually produces a countermeasure by the other in a lethal struggle for supremacy Development was not a straight line wrong ideas and assumptions led to defeat and disaster Iconography with dozens of photographs and often large format diagrams a vast bibliography and a complete and documented general approach make this volume a work of great quality and of great interest for all enthusiasts and scholars of this very interesting subject *Storia Militare* The modeller will not only find the text engaging but there is a superb collection of photographs and illustrations which of course include submarines corvettes and destroyers Subjects which the modeller increasingly appreciates Highly recommended *Model Boats* [Smoke and Mirrors](#) Deborah Lake, 2016-07-11 The Q ship an ordinary merchant vessel with concealed guns came into its own during the First World War when the Royal Navy to trap and destroy German U boats Deborah Lake uses a wide range of primary and secondary source material drawn from archives in the UK Germany and the USA to tell the compelling story of the Q ships and their U boat adversaries The Q ship operations themselves will be covered by following the careers of the eight men who won the Victoria Cross on Special Service Operations and by accounts of German U boat crews being on the receiving end No book on Q ships can avoid the Baralong incident in which a Q ship s crew allegedly executed the survivors of the German submarine U 27 on 19 August 1915 In a subsequent encounter with U 41 more British atrocities were alleged by the only two German survivors Revealing extracts from the diary of a Royal Marine who served on board the Baralong are reproduced in the book together with other first hand accounts With charge and counter charge this incident provides a fascinating story *The Phantom Army of Alamein* Rick Stroud, 2012-10-11 In 1940 a group of artists sculptors film makers theatre designers and set painters came together to form the Camouflage Unit Led by Major Geoffrey Barkas and including among their number the internationally renowned stage magician Jasper Maskelyne the unit s projects became a crucial battlefield weapon At the siege of Tobruk the unit made a vital desalination plant appear to have been destroyed by enemy bombers from then on they used their storytelling skills to weave intricate webs of deception making things appear that weren t actually there and things that were disappear to deceive the enemy Their stage was the enormous flat and almost featureless Western Desert The unit s schemes were so successful that in August 1942 the Unit was ordered by General Montgomery to come up with a way to hide the preparations for the Battle of Alamein the biggest battle the 8th Army had ever fought Operation Bertram was born In six short weeks two divisions with armour field guns and supporting vehicles were conjured from the sand while real tanks and lethal twenty five pound field guns vanished from sight Then on the eve of the battle the unit performed the biggest conjuring trick in military history Right in front of the German s eyes they made 600

tanks disappear and reappear fifty miles away disguised as lorries Rommel had been bamboozled by an army made of nothing but string and straw and bits of wood The Phantom Army of Alamein tells for the first time the full story of how some of Britain's most creative men put down their brushes pencils and cameras to join the rest of the world in the fight against the Nazis and played a vital role in the winning of the war **Weapons and Warfare** Spencer C. Tucker,2020-03-26 This work covers major weapons throughout human history beginning with clubs and maces through crossbows swords and gunpowder up to the hypersonic railgun lasers and robotic weapons under development today Weapons and Warfare is designed to provide students with a comprehensive and highly informative overview of weapons and their impact on the course of human history In addition to providing basic factual information this encyclopedia will delve into the greater historical context and significance of each weapon The chronological organization by time period will enable readers to fully understand the evolution of weapons throughout history The work begins with a foreword by a top scholar and a detailed introductory essay by the editor that provides an illuminating historical overview of weapons It then offers entries on more than 650 individual weapons systems Each entry has sources for further reading The weapons are presented alphabetically within six time periods ranging from the prehistoric and ancient periods to the contemporary period Each period has its own introduction that treats the major trends occurring in that era In addition 50 sidebars offer fascinating facts on various weapons Numerous illustrations throughout the text are also included **Sea Killers in Disguise** Tony Bridgland,1999

Naval Constabulary Operations and Fisheries Governance Sean A. G. Andrews, 2024-05-07 This book offers an analysis of naval constabulary operations in particular Australian fisheries patrols and challenges the widely accepted Anglo American school of maritime thought In the Indo Pacific fisheries and the activities of fishing boats are of increasing strategic importance in Australia's region Australia's Four Oceans Issues of overfishing population growth and climate change are placing growing pressure on fish as a resource and in doing so are making fisheries more significant and significant on a strategic as opposed to simply an economic or environmental level When combined with the growing use of fishing vessels as para naval forces it is clear that the activities of fishing vessels whether fishing or not fishing are matters of considerable strategic relevance This book illuminates contemporary seapower challenges explains and defines maritime security and examines and refines existing theory to advance a set of new or refined concepts to help frame the on water activities of constabulary operations reducing the possibility of on water miscalculation between states This book will be of much interest to students and scholars of naval studies and sea power maritime strategy maritime security and International Relations

A History of the Laws of War: Volume 1 Alexander Gillespie, 2011-09-06 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how In terms of context the first part of the book is about combatants and those who can lawfully take part in combat In many regards this part of the first volume is a series of less than ideal pathways This is because in an ideal world there would be no combatants because there would be no fighting Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed This is also not the case by which humanity has worked over the previous centuries Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish The restraints that have been applied are in terms of the quality and methods by which combatants are taken The considerations pertain to questions of biology such as age and sex geographical

considerations such as nationality and the multiple nuances of informal or formal combatants. These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent. Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful combatant. It has rarely been a question of numbers. It has been and remains one of type. The second part of this book is about people typically combatants captured in battle. It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands. The theme that ties all of these considerations together is that all of the acts befall those who are to one degree or another captives of their enemies. As such they are no longer masters of their own fate. As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare. It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself.
