Woodcock, R. A. Strachan, 2012-04-12 Britain and Ireland have a remarkably varied geology for so small a fragment of continental crust with a fine rock record back through three billion years of geological time This history would have been interesting enough if it had been played out on relatively stable continental crust However Britain and Ireland have developed at a tectonic crossroads on crust once traversed by subduction zones and volcanic arcs continental rifts and mountain belts The resulting complexity is instructive fascinating and perplexing *Geological History of Britain and Ireland* tells the region's story at a level accessible to undergraduate geologists as well as to postgraduates professionals or informed amateurs This second edition is fully revised and updated reflecting our continually developing knowledge of the region's geology Full coverage is again given to the rich Precambrian and Early Palaeozoic history as well as to later events more relevant to hydrocarbon exploration The book is an essential starting point for more detailed studies of the regional geology Additional resources for this book can be found at <http://www.wiley.com/go/woodcock/geologicalhistory> **Great British**

**Archaeology on Dry Land** Richard Bradley, 2022-05-19 This book is about two islands off the coast of Continental Europe the seas that surrounded them and the ways in which they were used over a period of three thousand years Instead of the usual emphasis on finds in the intertidal zone it focuses on parts of Britain and Ireland where traces of the prehistoric shoreline survive above sea level It explores a series of Neolithic and Early Bronze Age sites which were investigated in the nineteenth and early twentieth centuries and have been largely forgotten These places were very different from the Iron Age ports and harbors studied in recent years How can we identify these special sites and what are the best ways of interpreting them The book considers the evidence for travel by sea between the settlement of the earliest farmers and the long distance movement of metalwork It emphasizes the distinctive archaeology of a series of coastal locations Little of the information is familiar and some of the most useful evidence was recorded many years ago It is supplemented by new studies of these places and the artifacts found there as well as reconstructions of the prehistoric coastline The book emphasizes the important role of enclosed estuaries which were both sheltered harbors and special places where artifacts were introduced by sea Other items were made there and exchanged with local communities It considers the role played by these places in the wider pattern of settlement and their relationship to major monuments The book describes how the character of coastal sites changed in parallel with developments in maritime technology and trade The main emphasis is on Neolithic and Early Bronze Ages uses of the seashore but the archaeology of the Middle and Later Bronze Age provides a source of comparison

Sturt,2015-02-26 The prehistories of Britain and Ireland are inescapably entwined with continental European narratives The  
central aim here is to explore cross channel relationships throughout later prehistory investigating the archaeological links  
material social cultural between the areas we now call Britain and Ireland and continental Europe from the Mesolithic  
through to the end of the Iron Age Since the separation from the European mainland of Ireland c 16 000 BC and Britain c  
6000 BC their island nature has been seen as central to many aspects of life within them helping to define their senses of  
identity and forming a crucial part of their neighbourly relationship with continental Europe and with each other However it  
is important to remember that the surrounding seaways have often served to connect as well as to separate these islands  
from the continent In approaching the subject of continental connections in the long term and by bringing a variety of  
different archaeological perspectives associated with different periods to bear on it this volume provides a new a new  
synthesis of the ebbs and flows of the cross channel relationship over the course of 15 000 years of later prehistory enabling  
fresh understandings and new insights to emerge about the intimately linked trajectories of change in both regions
