The Posthuman Condition in 21st Century Literature and Culture María Ferrández-Sanmiguel, Esther Muñoz-González, Carmen Laguarda-Bueno, 2025-06-18 More than a decade after its first definitions critical posthumanism has become consolidated as a key discourse for the understanding of our contemporary state of being within what has been called the paradigm of posthumanity but also crucially as an ideology and a praxis that guides our engagements with the world around us This double dimension characterizes the contributions to this volume They resort to critical posthumanism in its most recent developments as a set of tools for critical and cultural analysis of our posthuman times as posthumanist concerns manifest in our cultural products This volume studies the most recent evolutions in the field of critical posthumanism as represented in key novels and other screened popular cultural products produced in the first and second decades of the twenty first century Resorting to the analytical tools provided by critical posthumanist

theory in cross disciplinary dialogue with other fields such as transhumanism feminist gender and queer theory vulnerability studies new materialism critical animal studies and environmental theory the scholars whose work this volume showcases bear witness to how literature and popular culture have been influenced and impressed by posthumanism Chapters 1 5 7 8 and 12 are available open access under a Creative Commons Attribution 4 0 International License via Springerlink *Tides* David George Bowers, Emyr Martyn Roberts, 2019-11-28 The tide is the greatest synchronised movement of matter on our planet Every drop of seawater takes part in tidal motion driven by the gravitational pull of the moon and sun At the coast we see the tide as a twice daily rise and fall of sea level that moves the edge of the sea up and down a beach or cliff face In some places the tide is small but at others it can rise in a few hours by the height of a three storey building it then has to be treated with great respect by those who live and work by the sea In this Very Short Introduction David George Bowers and Emyr Martyn Roberts explore what we know about the tides Blending clear explanations of well known tidal phenomena with recent insights in the deep ocean and coastal seas Bowers and Roberts use examples from around the world to tell the story of the tide considering its nature and causes its observation and prediction and unusual tides and their relevance They explore why tides have attracted the attention of some of the world's greatest scientists from the initial challenge of explaining why there are two tides a day when the moon and sun pass overhead just once a problem that was solved by Isaac Newton In the 19th century scientists unravelled the rhythms of the tide good tidal predictions in the form of tide tables were then possible The predictions were made on beautiful tide predicting machines constructed of brass and mahogany some of which can still be seen in maritime museums In the 20th century the importance of tides as mixers of sea water became evident As Bowers and Roberts explore tidal mixing of the ocean is essential for maintaining its deep circulation a key part of the climate control system of our planet In inshore waters tidal mixing enhances biological productivity influences sea temperature and turbidity and creates dramatic features such as maelstroms and tidal bores In the 21st century space probes are examining the effects of tidal processes on the moons of Jupiter and Saturn and the possibility of tidally heated liquid oceans with their own ecosystems Looking to the cutting edge of tidal research Bowers and Roberts also consider how we can study the role of the tide in the geological and biological evolution of our own planet with innovative computer models ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Love's Bitterest Cup Emma Dorothy Eliza Nevitte Southworth, 1889 **Vast Expanses** Helen M.

Rozwadowski, 2018-10-15 Much of human experience can be distilled to saltwater tears sweat and an enduring connection to the sea In *Vast Expanses* Helen M Rozwadowski weaves a cultural environmental and geopolitical history of that relationship a journey of tides and titanic forces reaching around the globe and across geological and evolutionary time Our ancient

connections with the sea have developed and multiplied through industrialization and globalization a trajectory that runs counter to Western depictions of the ocean as a place remote from and immune to human influence Rozwadowski argues that knowledge about the oceans created through work and play scientific investigation and also through human ambitions for profiting from the sea has played a central role in defining our relationship with this vast trackless and opaque place It has helped us to exploit marine resources control ocean space extend imperial or national power and attempt to refashion the sea into a more tractable arena for human activity But while deepening knowledge of the ocean has animated and strengthened connections between people and the world s seas to understand this history we must address questions of how by whom and why knowledge of the ocean was created and used and how we create and use this knowledge today Only then can we can forge a healthier relationship with our future sea
