Ian Jarvie, 2012-12-06 I C Jarvie was trained as a social anthropologist in the center of British social anthropology the London School of Economics where Bronislaw Malinowski was the object of ancestor worship Jarvie s doctorate was in philosophy however under the guidance of Karl Popper and John Watkins He changed his department not as a defector but as a rebel attempting to exorcize the ancestral spirit He criticized the method of participant observation not as useless but as not comprehensive it is neither necessary nor sufficient for the making of certain contributions to anthropology rather it all depends on the problem situation And so Jarvie remained an anthropologist at heart who in addition to some studies in rather conventional anthropological or sociological molds also studied the tribe of social scientists but also critically examining their problems especially their overall rather philosophical problems but not always so a few of the studies included in this volume exemplify his work on specific issues whether of technology or architecture or nationalism in the academy or moviemaking or even movies exhibiting excessive sex and violence These studies attract his attention both on account of their own merit and on account of their need for new and powerful research tools such as those which he has forged in his own intellectual workshop over the last two decades **Seamless Learning in the Age of Mobile**

Connectivity Lung-Hsiang Wong, Marcelo Milrad, Marcus Specht, 2014-11-02 The book departs from the approach of related titles by focusing on describing and reflecting upon the notion of seamless learning with regard to salient characteristics of learner mobility and bridging of learning experiences across learning spaces It is the first such work that is solely dedicated to research on and the practice of seamless learning uniquely combining interpretations visions and past research on and practices in seamless learning from diversified perspectives The book also strikes a good balance between theoretical and practical perspectives going beyond a collection of reports on specific research projects Instead of thick descriptions of research processes and findings readers will find significant insights and food for thought intended to inspire further advances in the research on and practice of seamless learning Seamless Government Russell Matthew Linden, 1994-09-05
