Barkan,1994 **Cityports, Coastal Zones and Regional Change** B. S. Hoyle,1996-08-30 Even in the late 20th Century there remains a complex web of spatial inter relationships linking port cities and coastal zones Cityports Coastal Zones and Regional Change brings together seventeen authors to explore aspects of these inter relationships Many of the chapters were first discussed at an intensive British Italian Seminar held in Venice in 1994 and have subsequently been substantially revised edited and updated The essential focus of the book is on the role of port cities in the development and management of the coastal zones within which

they are located There is a strong emphasis on environmental issues economic diversification and planning While most of the numerous case studies featured are British or Italian other areas represented include Scandinavia Eastern Europe the Balkans Tropical Africa and North America An overview of cityports and coastal zones in the context of sustainable development provides a timely and forward looking conclusion and makes the book ideal for researchers and students of transport geography urban geography port studies and coastal zone management worldwide **The International Journal of African Historical Studies** ,1984 **Port Development and Competition in East and Southern Africa** Martin Humphreys,Aiga Stokenberga,Matias Herrera Dappe,Olivier Hartmann,2019-07-16 Port Development and Competition in East and Southern Africa analyzes the 15 main ports in East and Southern Africa ESA to assess whether their proposed capacity enhancements are justified by current and projected demand whether the current port management approaches sufficiently address not only the maritime capacity needs but also other impediments to port efficiency and what the expected hierarchy of ports in the region will be in the future The analysis confirms the need to increase maritime capacity as the overall container demand in the ports in scope is predicted to begin exceeding total current capacity by between 2025 and 2030 while gaps in terms of dry and liquid bulk handling are expected even sooner However in the case of many of the ports the issue of landside access the ports intermodal connectivity the ease of international border crossing and the port city interface is more important than the need to improve maritime access and capacity The analysis finds that there is a need to improve the operating efficiency in all of the ESA ports as they are currently less than half as productive as the most efficient ports in the matched data set of similar ports across the world in terms of efficiency in container handling operations Similarly there is a need to improve and formalize stakeholder engagement in many of the ports to introduce modern management systems and to strengthen the institutional framework to ensure the most efficient use of the infrastructure and to be able to attract private capital and specialist terminal operators Finally given the ports geographic location and proximity to main shipping routes available draft and the ongoing port and hinterland development the book concludes that Durban and Djibouti are the most likely to emerge as the regional hubs in ESA s future hub and spoke system
