Terrestrial Vegetation of California, 3rd Edition Michael Barbour, Todd Keeler-Wolf, Allan A. Schoenherr, 2007-07-17 This completely new edition of *Terrestrial Vegetation of California* clearly documents the extraordinary complexity and richness of the plant communities and of the state and the forces that shape them. This volume is a storehouse of information of value to anyone concerned with meeting the challenge of understanding, managing or conserving these unique plant communities under the growing threats of climate change, biological invasions and development. Harold Mooney, Professor of Environmental Biology, Stanford University. The plants of California are under threat like never before. Traditional pressures of development and invasive species have been joined by a newly recognized threat: human-caused climate change. It is essential that we thoroughly understand current plant community dynamics in order to have a hope of conserving them. This book represents an important, well-timed advance in knowledge of the vegetation of this diverse state and is an essential resource for professionals, students and the general public alike. Brent Mishler, Director of the University and Jepson Herbaria and Professor of Integrative Biology, University of California, Berkeley.
