Seaside Debates A Critique Of The New Urbanism:

The Seaside Debates Seaside Institute, 2002 This series of presentations and critiques which took place at the Seaside Institute in Seaside Florida highlights the major issues of New Urbanism as they were discussed by the key players in the field such as Andres Duany Elizabeth Plater Zyberk Stefanos Polyzoides and Daniel Solomon as well as such academic critics as Witold Rybczynski Colin Rowe Judith DiMaio Alex Krieger Alan Plattus and others Issues of growth management promotion of civic life land conservation and rational transportation were discussed focusing on eight U S and Canadian cities as examples The Seaside Debates Todd W. Bressi, 2002 Seaside Steven Brooke, 2005-01-01 This completely revised second edition of Seaside is the guide to the famous Florida resort town complete with maps walking tours updated addresses aerial views and a look inside some of Seaside's most beautifully decorated homes For the first time a complete list of every town structure and its designer is included **The Landscape of Reform** Ben A. Minter, 2006 In *The Landscape of Reform* Ben Minter offers a fresh and provocative reading of the intellectual foundations of American environmentalism focusing on the work and legacy of four important conservation and planning thinkers in the first half of the twentieth century Liberty Hyde Bailey a forgotten figure in the Progressive conservation movement urban and regional planning theorist Lewis Mumford Benton MacKaye the forester and conservationist who proposed the Appalachian Trail in the 1920s and Aldo Leopold author of the environmentalist classic *A Sand County Almanac* Minter argues that these writers blazed a significant third way in environmental ethics and practice a more pragmatic approach that offers a counterpoint to the anthropocentrism versus ecocentrism use versus preservation narrative that has long dominated discussions of the development of American environmental thought Minter shows that the environmentalism of Bailey Mumford MacKaye and Leopold was also part of a larger moral and political program one that included efforts to revitalize democratic citizenship conserve regional culture and community identity and reclaim a broader understanding of the public interest that went beyond economics and materialism Their environmental thought was an attempt to critique and at the same time reform American society and political culture Minter explores the work of these four environmental reformers and considers two present day manifestations of an environmental third way Natural Systems Agriculture an alternative to chemical and energy intensive industrial agriculture and New Urbanism an attempt to combat the negative effects of suburban sprawl By rediscovering the pragmatic roots of American environmentalism writes Minter we can help bring about a new civic minded environmentalism today An Analysis of Jane Jacobs's *The Death and Life of Great American Cities* Martin Fuller, Ryan Moore, 2017-07-05 Despite having no formal training in urban planning Jane Jacobs deftly explores the strengths and weaknesses of policy arguments put forward by American urban planners in the era after World War II They believed that the efficient movement of cars was of more value in the development of US cities than the everyday lives of the people living there By carefully examining their relevance in her 1961 book *The Death and Life of Great American Cities* Jacobs dismantles

these arguments by highlighting their shortsightedness She evaluates the information to hand and comes to a very different conclusion that urban planners ruin great cities because they don't understand that it is a city's social interaction that makes it great Proposals and policies that are drawn from planning theory do not consider the social dynamics of city life They are in thrall to futuristic fantasies of a modern way of living that bears no relation to reality or to the desires of real people living in real spaces Professionals lobby for separation and standardization splitting commercial residential industrial and cultural spaces But a truly visionary approach to urban planning should incorporate spaces with mixed uses together with short walkable blocks large concentrations of people and a mix of new and old buildings This creates true urban vitality

New Urbanism and American Planning Emily Talen, 2005 Surveying four approaches to city making the author here gives an assessment of the development of American urbanism highlighting recurrent themes and how these interact merge and conflict

Shaping American Democracy Scott M. Roullet, 2017-12-06 This book argues that the design of built spaces influences civic attitudes including prospects for social equality and integration in America Key American architects and planners including Frederick Law Olmsted Frank Lloyd Wright Robert Moses and the New Urbanists not only articulated unique visions of democracy in their extensive writings but also instantiated those ideas in physical form Using criteria such as the formation of social capital support for human capabilities and environmental sustainability the book argues that the designs most closely associated with a communally inflected version of democracy such as Olmsted's public parks or various New Urbanist projects create conditions more favorable to human flourishing and more consistent with a democratic society than those that are individualistic in their orientation such as urban modernism or most suburban forms

Anamnesia Peter Collier, Anna Magdalena Elsner, Olga Smith, 2009 Memory has always been crucial to French literature and culture as a means of mediating the relationship between perception and knowledge of the individual coming to terms with his identity in time Relatively recently memory has also emerged as the key force in the creation of a collective consciousness in the wider perspective of French cultural history This collection of essays selected from the proceedings of a seminar on Memory given by Dr Emma Wilson at the University of Cambridge offers a fresh evaluation of memory as both a cultural and an individual phenomenon in modern and contemporary French culture including literature cinema and the visual arts Anamnesia the book's title develops the Aristotelian concept of anamnesis recollection as a dynamic and creative process which includes forgetting as much as remembering concealment as much as imagination Memory in this extremely diverse range of essays is therefore far from being presented as a straightforward process of recalling the past but emerges as the site of research and renegotiation of contradictions and even aporia

A Delicate Balance Angela C. Halfacre, 2013-04-15 Sustainability of the natural environment and of our society has become one of the most urgent challenges facing modern Americans Communities across the country are seeking a viable pattern of growth that promotes prosperity protects the environment and preserves the distinctive quality of life of their regions The coastal zone of South Carolina is one of the most endangered culturally complex regions in the state and perhaps in all of the American South A Delicate Balance examines how a multilayered culture of environmental conservation and sustainable development has emerged in the lowcountry of South Carolina Angela C Halfacre a political scientist describes how sprawl shock natural disaster climate change and other factors spawned and sustain but also threaten and hinder the culture of conservation Since Hurricane Hugo in 1989 the coastal region of South Carolina has experienced unprecedented increases in residential and commercial development A Delicate Balance uses interdisciplinary literature and ethnographic historical and spatial methods

to show how growing numbers of lowcountry residents bolstered by substantial political corporate and media support have sought to maintain the region's distinctive sense of place as well as its fragile ecology. The diverse social and cultural threads forming the fabric of the lowcountry conservation culture include those who make their living from the land such as African American basket makers and multigenerational farmers as well as those who own, manage and develop the land and homeowner association members. Evolving perceptions, policies and practices that characterize community priorities and help to achieve the ultimate goal of sustainability are highlighted here. As Halfacre demonstrates, maintaining the quality of the environment while accommodating residential, commercial and industrial growth is a balancing act replete with compromises. This book documents the origins, goals, programs, leaders, tactics and effectiveness of a conservation culture. *A Delicate Balance* deftly illustrates that a resilient culture of conservation that wields growing influence in the lowcountry has become an important regional model for conservation efforts across the nation. *A Delicate Balance* also includes a foreword by journalist Cynthia Barnett, author of *Blue Revolution: Unmaking America's Water Crisis* and *Mirage: Florida and the Vanishing Water of the Eastern U.S.*
