and the threat of climate change How the Other Half Looks reveals how the Lower East Side has inspired new ways of looking and looking back that have shaped literary and popular expression as well as American modernity *American Exposures* Louis Kaplan, 2005 *American Exposures* sheds light on photographs from Arthur Mole's propagandistic living photographs of American icons and symbols to the exploration of contemporary subcultural communities by the Korean born photographer and performance artist Nikki Lee and asserts that the depiction of community is a central component to photography Louis Kaplan deploys a number of critical concepts and theories developed by Jean Luc Nancy in *The Inoperative Community* as well as other philosophers and applies them to the field of photography studies With an original approach to photography from Edward Steichen's *Family of Man* exhibition to Pedro Meyer and the rise of the digital image Kaplan points to a new way to think about the intimate relationship among photography American life and the artistic imagination Back cover
