Seasonality, Rural Livelihoods and Development Stephen Devereux, Rachel Sabates-Wheeler, Richard Longhurst, 2013-07-03 Seasonality is a severe constraint to sustainable rural livelihoods and a driver of poverty and hunger particularly in the tropics Many poor people in developing countries are ill equipped to cope with seasonal variations which can lead to drought or flood and consequences for agriculture employment food supply and the spread of disease The subject has assumed increasing importance as climate change and other forms of development disrupt established seasonal patterns and variations This book is the first systematic study of seasonality for over twenty years and it aims to revive academic interest and policy awareness of this crucial but neglected issue Thematic chapters explore recent shifts with profound implications for seasonality including climate change HIV AIDS and social protection Case study chapters explore seasonal dimensions of livelihoods in Africa Ethiopia Kenya Malawi Asia Bangladesh China India and Latin America Peru Others assess policy responses to adverse seasonality for example through irrigation migration and seasonally sensitive education The book also includes innovative tools for monitoring seasonality which should enable more appropriate responses

Papers of the Conference on Seasonal Dimensions to Rural Poverty: Seasonality, subsistence agriculture, and labour : 1978\* Coping with Seasonal Constraints Rebecca Huss-Ashmore, 1988-01-29 Seasonal fluctuations constrain the food production options of nonindustrial peoples How do people cope with these constraints and what are the consequences of seasonality for human health and well being The papers in this volume address these issues from a variety of perspectives Included are studies of physiological responses to seasonal scarcity seasonality research in archaeology and ethnographic case studies of the role of seasonality in food procurement MASCA Vol 5

**Seasonality and Agriculture in the Developing World** Gerard J. Gill, 1991-04-11 Seasonal variation in welfare in rural areas of the Third World is a recognised problem In general the poorer people are the more they tend to suffer during the season of hunger and sickness This book takes an overall view of the seasonality problem exploring its climatic and social roots

**Gender Challenges** Bina Agarwal, 2015-12-21 An internationally acclaimed economist Bina Agarwal is known for her path breaking writings on agriculture property rights and the environment Her three volume compendium brings together a selection of her essays written over three decades Combining diverse disciplines methodologies and cross country

comparisons the essays challenge standard economic analyses and assumptions from a gender perspective They provide original insights on a wide range of theoretical empirical and policy issues of continuing importance in contemporary debates The first volume spans varied dimensions of the author s writings on agrarian change from 1981 to the present It identifies gender inequalities in the impact of agricultural modernisation and technical change across Asia and Africa the links between women poverty and economic growth processes and data biases in measuring women s work It traces the gendered costs of droughts and famine and challenges top down methods of innovation diffusion Focusing on the key role of women farmers in food security it also offers innovative solutions including public land banks and group farming The second volume focuses on the author s paradigm shifting work on women s property status in South Asia Challenging conventional approaches to women s empowerment it demonstrates how promoting access to property especially land is key to enhancing women s economic and social well being and deterring domestic violence It details gender inequalities in inheritance laws public policies and land struggles and presents the bargaining framework for understanding and finding ways of overcoming these inequalities both within families and in markets communities and vis vis the state This third volume traces the relationship between gender and environmental change Critiquing ecofeminist assumptions it presents an alternative theoretical framework It also examines the causes of women s absence as well as the impact of their presence in environmental collective action Based on innovative fieldwork on community institutions for forest governance the author demonstrates how a critical mass of women can significantly improve conservation outcomes In conclusion she reflects on which features of feminist scholarship make for an effective challenge to mainstream economics

Change in the Amazon Basin John Hemming, 1985 Conference report on development projects environmental dangers agricultural production and agroforestry by indigenous peoples and historical change in the Amazonia river basin Brazil considers the impact of development projects on the living conditions of Andean Indian tribes negative effects of deforestation hydrological aspects of rainforest in the central Amazon tropical zone etc includes a historical survey of the rubber boom Bibliography diagrams maps photographs references statistical tables

**People of the Plow** James McCann, 1995-07-15 For more than two thousand years Ethiopia s ox plow agricultural system was the most efficient and innovative in Africa but has been afflicted in the recent past by a series of crises famine declining productivity and losses in biodiversity James C McCann analyzes the last two hundred years of agricultural history in Ethiopia to determine whether the ox plow agricultural system has adapted to population growth new crops and the challenges of a modern political economy based in urban centers This agricultural history is set in the context of the larger environmental and landscape history of Ethiopia showing how farmers have integrated crops tools and labor with natural cycles of rainfall and soil fertility as well as with the social vagaries of changing political systems McCann traces characteristic features of Ethiopian farming such as the single tine scratch plow which has retained a remarkably consistent design over two millennia and a crop repertoire that is among the most genetically diverse in the world People of

the Plow provides detailed documentation of Ethiopian agricultural practices since the early nineteenth century by examining travel narratives early agricultural surveys photographs and engravings modern farming systems research and the testimony of farmers themselves collected during McCann's five years of fieldwork He then traces the ways those practices have evolved in the twentieth century in response to population growth urban markets and the presence of new technologies

Revolutions in Development Inquiry Robert Chambers, 2012-05-04 Robert Chambers draws together and reviews the revolutionary changes in the methodologies and methods of development inquiry that have occurred and reflects on their transformative potential for the future

**The Comparative Political Economy of Development** Barbara Harriss-White, Judith Heyer, 2009-12-21 Illustrates the enduring relevance and vitality of the comparative political economy of development approach and presents the relation between theory and empirical material in an interactive way This title offers an explanation of what is happening in the continent of Africa and the sub continent of South Asia

*African Food Systems in Crisis* Rebecca Huss-Ashmore, Solomon H Katz, 2019-07-19 Originally published in 1991 Commissioned by the Task Force on African Famine of the American Anthropological Association this the second part of a project examining the causes of food system failure in Africa and the effects of attempts to remedy the situation It evaluates the often retrogressive results of foreign aid to African nations and offers an anthropological perspective on how to reverse this trend The contributors emphasize integrating all development programs with the regional customs and traditions already in place that have thus far allowed its people to cope with food and water shortages In the past various strategies have failed due to misunderstandings and incorrect assumptions concerning gender roles food consumption habits social relations kinship networks land use and government function New understanding of the culture must be complemented with multifaceted programs incorporating education a concern for grass roots opinion and control attention to production and consumption patterns and various forms of broad spectrum integrated development The uniqueness research is recommended for all who are concerned about worldwide malnutrition and those who understand the need to recognize local traditions as resources that must be included in any successful development program

**Temperature and Environmental Effects on the Testis** Adrian W. Zorngiotti, 2013-03-13 It must be considered that there is nothing more difficult to carry out nor more doubtful of success nor more dangerous to handle than to initiate a new order of things Machiavelli The Prince 1513 These are the Proceedings of a Conference on Temperature and Environmental Factors and the Testis which took place at New York University School of Medicine December 8th and 9th 1989 There is good reason to believe that this was the first of its kind to address exclusively the implications of temperature for this highly thermosensitive organ and its precious genetic cargo The organizers of the Conference hoped to stimulate interest in this area which paradoxically has a considerable literature but which has received scant attention and sometimes outright

opposition from clinicians expert in male infertility There have been studies of the relationship of temperature to reproduction starting in the mid 18th Century with observations of the relationship of water temperature to spawning of fish There is also a vast literature on the deleterious effects of externally applied heat upon spermatogenesis but little study of the possibility that intrinsic heat may be an important etiologic factor in subfertile semen Today fertility research has largely ignored this in favor of research in areas which have not produced successes in terms of live births comparable to what can be obtained by varicocelectomy when appropriate or scrotal hypothermia viz 1 Concentration upon the endocrine aspects of testicular function and its relation to spermatogenesis **Critical Reviews in Tropical Medicine** R.K. Chandra,2012-12-06

At the present time there are renewed global efforts to control the major tropical infections and to stem the tide of malnutrition the two serious often intertwined problems that contribute to much of the morbidity and mortality in under privileged populations Many international organizations have joined hands with national governments and with the private sector to search for new approaches to problems that beset much of the developing world including countries in the tropical region This volume continues the tradition of the previous publication in the Series A variety of fare is offered to readers explanations of the activities and achievements of the UNDP World Bank WHO Special Programme for Research and Training in Tropical Diseases and studies of infant mortality schistosomiasis trypanosomiasis helminths lactase deficiency oral rehydration therapy functional consequences of iron deficiency and fertility control Authoritative state of the art reviews provide a critical analysis of recent data I hope the Series will continue to prove useful to all those working in the tropics and to those in the industrialized countries whose awareness of physical health problems of the Third World is relatively limited R K Chandra St John s Newfoundland VII Contents Chapter 1 The Special Programme for Research and Training in Tropical Diseases DAVID S ROWE 1 Origins Objectives and Diseases 1 2 The Modus Operandi of the Programme 3 2 1 Scientific Working Groups 3 2 2 Research Strengthening Group 7 2 3 The Scientific and Technical Advisory Committee 7 2 4 Joint Coordinating Board **Revolutionizing Development** Andrea Cornwall,Ian Scoones,2022-03-28 This book tells the story of development studies in practice over the last fifty years through the work of one remarkable individual Robert Chambers His work has taken him from being a colonial officer in Kenya through training and managing large rural development projects to a fundamental critique of top down development and the championing of participatory approaches The contributors eloquently demonstrate how he has been at the centre of major shifts in development thinking and practice over this period popularising terms that are now at the centre of the development lexicon such as vulnerability multi dimensional poverty sustainable livelihoods and farmer first Robert Chambers played a major role in the massive growth in participatory approaches to development and particularly the application of participatory methods in development research and appraisal This has led to fundamental challenges to development practice ranging from approaches to monitoring and evaluation to institutional learning and professional training There is probably no one who has had more influence on approaches to

development in the past decades Revolutionizing Development offers a unique overview of these contributions in thirty two concise chapters from authors who have been intimately involved as collaborators critics and colleagues of Robert Chambers

Development and the Environmental Crisis Michael Redclift, 2010-11-26 First published in 1984 Michael Redclift's book makes the global environmental crisis a central concern of political economy and its structural causes a central concern of environmentalism Michael Redclift argues that a close analysis of the environmental crisis in the South reveals the importance of the share of resources obtained by different social groups The development strategies based on the experiences and interests of Western capitalist countries fail to recognise that environmental degradation in the South is a product of inequalities in both global and local economic relations and cannot be solved simply by applying solutions borrowed from environmentalism in the North The key to understanding the South's environmental problems lies in the recognition that structural processes markets technology state intervention are also a determining influence upon the way natural resources are used Through his review of Europe's Green Movement contemporary breakthroughs in biotechnology and information systems and recent feminist discourse Michael Redclift has enlarged the compass of the environmental debate and produced a book which should serve as a benchmark in future discussions of development and the environment It will be of importance to students in a range of disciplines within development studies geography ecology and the social sciences

*Different Places, Different Voices* Vivian Kinnaird, Janet Momsen, 2002-03-11 *Different Places Different Voices* challenges Western feminist and post colonial approaches in its analysis of the changing lives of women of Asia Africa Latin America and Oceania Recognising the significance of place this is a book informed by the voices of female geographers from the developing world Twenty case studies present regional perspectives on urban and rural development household reproduction and production and community organisation The theoretical and contextual approach and the emphasis on location and positionality highlight the differences created by place to suggest other ways of seeing
