Ethical Reasoning in International Affairs C. Navari,2013-11-06 Arguing for a middle ground between idealism and realism this book considers the most pressing ethical and moral issues in contemporary international politics including intervention human rights and aid and sets about reasoning how to resolve them in politically realistic ways Nationalism and Intra-State Conflicts in the Postcolonial World Fonkem Achankeng,2015-09-28 This book highlights the complexities of nationalism and the struggles of different groups left unaddressed within the nation states of a postcolonial world The central question is what happened to the worldly and radical visions of freedom liberty and equality that animated intellectual activists and policy makers from Woodrow Wilson in the 1920s This book analyzes the outcome of lumping disparate groups of people together under one nation state and holding them together against the knowledge of the incompatibility theory of plural states In a world of arbitrarily and colonially mapped sovereign states groups and nations with distinctive histories and cultures trapped within the borders of sovereign states want the freedom to decide their own destinies This book challenges deconstructs and decolonizes Western epistemologies related to postcolonial state formation and maintenance In examining the freedom concept that no human group ought to be determining the independence of other human groups this book constructs an alternative conceptualization of nations and peoples rights in the twenty first century in which radical hopes and global dreams are recognized as central to internal nationalism struggles **The Oxford Handbook of Comparative**

Constitutional Law Michel Rosenfeld,András Sajó,2012-05-17 A comprehensive reference resource on comparative constitutional law this title examines the history and development of the discipline its core concepts institutions rights and emerging trends **Indigenous Peoples in International Law** S. James Anaya,2004 In this thoroughly revised and

updated edition of the first book length treatment of the subject S James Anaya incorporates references to all the latest treaties and recent developments in the international law of indigenous peoples Anaya demonstrates that while historical

trends in international law largely facilitated colonization of indigenous peoples and their lands modern international law's human rights program has been modestly responsive to indigenous peoples' aspirations to survive as distinct communities in control of their own destinies This book provides a theoretically grounded and practically oriented synthesis of the historical contemporary and emerging international law related to indigenous peoples It will be of great interest to scholars and lawyers in international law and human rights as well as to those interested in the dynamics of indigenous and ethnic identity

The Concept of Group Rights in International Law Corsin Bisaz, 2012-08-28 The Concept of Group Rights in International Law offers a critical appraisal of the concept of group rights in international law on the basis of an extensive survey of existing group rights in contemporary international law Among some of its findings is the observation that an ideological way of arguing about this legal category is widespread among scholars as well as practitioners it sees this ideological framing as one of the main reasons why international law has so far been very reluctant to provide group rights and to call them by their name Accordingly the book re-evaluates the concept based on the experience with existing group rights in international law and pleads for a more pragmatic approach Despite limitations with the concept the overall thesis is that there is a role for group rights as a pragmatic tool allowing for a principled approach to substate groups through international law Such an approach could turn group rights into an arguably minor but nevertheless highly relevant legal category of international law

De Facto States and Land-for-Peace Agreements Eiki Berg, Shpend Kursani, 2021-12-21 This book presents an analytical framework

which assesses how land for peace agreements can be achieved in the context of territorial conflicts between de facto states and their respective parent states The volume examines geographic solutions to resolving ongoing conflicts that stand between the principle of self determination prompted by de facto states and the principle of territorial integrity prompted by parent states The authors investigate the conditions under which territorial adjustments can bring about a possibility for peace between de facto states and their parent states It does so by interrogating the possibility of land for peace agreements in four de facto state parent state pairs namely Kosovo Serbia Nagorno Karabakh Azerbaijan Northern Cyprus Republic of Cyprus and Abkhazia Georgia The book suggests that the value that parties put on land to be exchanged and peace to be achieved stand at odds for land for peace agreements to materialise The book brings theoretical and empirical insights that open several avenues for discussions on the conservative stance that the international community has held on territorial changes in the post 1945 international order This book will be of much interest to students of statebuilding state formation secessionism political geography and international relations

Secessionism and Separatism in Europe and Asia

Jean-Pierre Cabestan,Aleksandar Pavković,2013 The boundaries between secessionism and separatism are often blurred and in many cases study of secessionism encompasses that of separatism and vice versa Recognising this inherent relationship this book provides a comparative survey of recent attempts at secession and separatist movements from across Europe and Asia and assesses the responses of the respective host governments The essays address two main questions which arise from the relationship between state governments and secessionist movements first how secessionist or separatist movements gather support and mobilize their target populations and second how central political authorities respond to the challenges that secessionist or separatist movements pose to their capacity to control the country With political analysis of recent cases ranging from the Balkans the USSR the UK and the Basque Country to Sri Lanka Burma China Tibet and Taiwan the authors identify both similarities and differences in the processes and outcomes of secessionist and separatist movements across the two distinct regions This volume will be an invaluable resource for those who wish to understand the dynamics of secessionist movements and as such will appeal to students and scholars of Asian and European politics comparative politics international relations and conflict studies It will also be helpful to practitioners and policy makers who wish to understand and contribute to the resolution of such conflicts

Peoples and Minorities in International Law

Catherine Brölmann,René Lefeber,Marjoleine Zieck,2023-12-11 The revival of group consciousness in Eastern European countries in the wake of the Cold War has put the protection of subnational groups high on the political agenda The present book bears witness to the renewed interest in the legal position of subnational groups in international law This book and the Conference at which provisional versions of most of the contributions were presented originate in perceived deficiencies of contemporary international law to protect subnational groups within a legal framework of which the principal subjects are states Divided into three parts the book commences with an analysis of the antagonistic relation between the right of peoples to self

determination and the right of states to territorial integrity and the need to redefine these concepts in the post Cold War era The book continues with the highly controversial issue of the attribution of rights to subnational groups and the identification of subnational groups which would be entitled to such rights The second part deals with the identification and protection of peoples and minorities at different levels of organization viz subnational national and supranational This part is followed by an analysis of the modes and means by which international obligations vis vis subnational groups can be enforced Not only the judicial means are considered but also the justifiability of recourse to military means to the cause of subnational groups This book not only provides an in depth analysis of contemporary international law with respect to the protection of peoples and minorities but also of the law as it is developing in the post Cold War era

The Theory of Self-Determination

Fernando R. Tesón,2016-04-07 When can a group legitimately form its own state Under international law some groups can but others cannot But the standard is unclear and traditional legal analysis has failed to elucidate it In The Theory of Self Determination leading scholars chart new territory in our theoretical conception of self determination Drawing from diverse scholarship in international law philosophy and political science they attempt to move beyond the prevailing nationalist conceptions of group definition At issue are such universal questions as when does a group qualify as a people Does history matter Or is it a question of ethnic status Are these matters properly solved by popular vote Anchored in modern analytical political philosophy but with implications for a wide range of scholarship this volume will prove essential for scholars and practitioners of international law global justice and international relations

Secession Marcelo G. Kohen,2006-03-30

The end of the Cold War brought about new secessionist aspirations and the strengthening and re awakening of existing or dormant separatist claims everywhere The creation of a new independent entity through the separation of part of the territory and population of an existing State raises serious difficulties as to the role of international law This book offers a comprehensive study of secession from an international law perspective focusing on practice and applicable rules of international law It includes theoretical analyses and a scrutiny of practice throughout the world by eighteen distinguished authors from Western and Eastern Europe North and Sub Saharan Africa North and Latin America and Asia Core questions are addressed from different perspectives and in some cases with divergent views The reader is also exposed to a far reaching picture of State practice including some cases which are rarely mentioned and often neglected in scholarly analysis of secession
