Landscape and Power in Geographical Space as a Social-Aesthetic Construct Olaf Kühne, 2018-02-13 This book examines the power definiteness of landscape from a social constructivist perspective with a particular focus on the importance of aesthetic concepts of landscape in development It seeks to answer the question of how societal notions of landscape emerge how they are individually updated and how these ideas affect the use and design of physical space It also analyzes how physical manifestations of societal activity impact on understandings of individual and societal landscapes and addresses the essential aspect of the social construction of landscape cultural specificity which in turn is discussed in the context of the expansion of a western landscape concept The book offers an unprecedented comprehensive and detailed examination of societal power relations in the context of landscape development The numerous case studies from the physical manifestation of modern spatial planning in the United States the power discourses concerning the design of model railway landscapes and the medial production of stereotypical landscape notions shed light on the complex and multilayered interactions of collective and individual landscape references It is a valuable resource for geographers sociologists landscape architects landscape planners and philosophers *Pierre Koenig* Neil Jackson, 2019-02-05 A heavily illustrated and highly designed tribute to Los Angeles architect Pierre Koenig a key figure of the Los Angeles Modernist movement In this remarkable and gorgeously illustrated book Neil Jackson presents a vibrant profile of the Los Angeles architect Pierre Koenig who Time magazine said lived long enough to become cool twice From the influences of Koenig s youth in San Francisco and his military service during World War II to the Case Study Houses and his later award laden years Jackson s study plots the evolution of Koenig s oeuvre against the backdrop of Los Angeles a city that both shaped and was shaped by his architecture

The book is anchored by Jackson's exciting discoveries in Koenig's archive at the Getty Research Institute. Drawings, photographs, diaries, letters, lecture notes, building contracts, and university projects, many of which are published for the first time, provide an expanded understanding of Koenig and additional context for his architectural achievements. An examination of Koenig's Case Study Houses shows how his often single-minded and pragmatic approach to domestic architecture recognized the advantages of production housing and presciently embraced sustainable, ecologically responsible design. A new account of the Chemehuevi housing project in Havasu Lake, California, demonstrates the special role that learning and teaching played in the development of his architecture. Over his fifty-year career, Koenig not only designed iconic houses but also directed their restoration and curated their legacy, ensuring that his work could be seen and appreciated by present and future admirers of midcentury Los Angeles.

Shaping the City Rodolphe El-Khoury, Edwards Robbins, 2015-06-23 Taking on the key issues in urban design, *Shaping the City* examines the critical ideas that have driven these themes and debates through a study of particular cities at important periods in their development. As well as retaining crucial discussions about cities such as Los Angeles, Atlanta, Chicago, Detroit, Philadelphia, and Brasilia at particular moments in their history that exemplified the problems and themes at hand, like the mega-city, the post-colonial city, and New Urbanism, in this new edition the editors have introduced new case studies critical to any study of contemporary urbanism: China, Dubai, Tijuana, and the wider issues of informal cities in the Global South. The book serves as both a textbook for classes in urban design, planning, and theory and is also attractive to the increasing interest in urbanism by scholars in other fields. *Shaping the City* provides an essential overview of the range and variety of urbanisms and urban issues that are critical to an understanding of contemporary urbanism.
