Los Angeles County Museum Of Art Bulletin 1979:

American Artists Engage the Built Environment, 1960-1979 Susanneh Bieber, 2023-07-31 This volume reframes the development of US American avant garde art of the long 1960s from minimal and pop art to land art conceptual art site specific practices and feminist art in the context of contemporary architectural discourses Susanneh Bieber analyzes the work of seven major artists Donald Judd Robert Grosvenor Claes Oldenburg Robert Smithson Lawrence Weiner Gordon Matta Clark and Mary Miss who were closely associated with the formal aesthetic innovations of the period While these individual artists came to represent diverse movements Bieber argues that all of them were attracted to the field of architecture the work of architects engineers preservationists landscape designers and urban planners because they believed these practices more directly shaped the social and material spaces of everyday life This book's contribution to the field of art history is thus twofold First it shows that the avant garde of the long 1960s did not simply develop according to an internal logic of art but also as part of broader sociocultural discourses about buildings and cities Second it exemplifies a methodological synthesis between social art history and poststructural formalism that is foundational to understanding the role of art in the construction of a more just and egalitarian society The book will be of interest to scholars working in art history architecture urbanism and environmental humanism

Impressionism John House, 2004-01-01 A new perspective on Impressionist art that offers revealing fresh interpretations of familiar paintings In this handsome book a leading authority on Impressionist painting offers a new view of this admired and immensely popular art form John House examines the style and technique subject matter and imagery exhibiting and marketing strategies and social political and ideological contexts of Impressionism in light of the perspectives that have been brought to it in the last twenty years When all of these diverse approaches are taken into account he argues Impressionism can be seen as a movement that challenged both artistic and political authority with its uncompromisingly modern subject matter and its determinedly secular worldview Moving from the late 1860s to the early 1880s House analyzes the paintings and career strategies of the leading Impressionist artists pointing out the ways in which they countered the dominant conventions of the contemporary art world and evolved their distinctive and immediately recognizable manner of painting Focusing closely on the technique composition and imagery of the paintings themselves and combining this fresh appraisal with recent historical studies of Impressionism House explores how pictorial style could generate social and political meanings and opens new ways of looking at this luminous art

Rembrandt Ernst van de Wetering, 2009-04-06 Ernst van de Wetering's wonderful book has taken us further than almost any study over the past twenty years towards an understanding of the machinery of Rembrandt's genius No one attempting to write about Rembrandt in the future will be able to do so without taking this fine work into account Simon Schama Who would not have wanted to look over Rembrandt's shoulder while he painted Among the countless books on Rembrandt that by Ernst van de Wetering comes closest to conveying something of this experience because the author combines the qualifications of a trained connoisseur and of a practising painter Ernst Gombrich

Kazimir Malevich Rainer Crone,David Moos,1991 Malevich's sudden and startling realization of a non objective way of painting which he termed Suprematism stands as a seminal moment in the history of twentieth century art Rainer Crone and David Moos trace the artist's development from his beginnings in the Ukraine and early years in Moscow where he was closely involved in the Futurist circle through to the late 1920s and beyond The authors of this book convincingly demonstrate that it is only through a close and sustained reading of Malevich's late and still widely misunderstood painterly oeuvre that his extraordinarily inventive stance can truly be comprehended Crone and Moos trace the close relationship between Malevich's practice and other contemporary non political revolutions in physics linguistics and poetry They present Malevich as a uniquely creative artist embodying in his work many of the insights and discoveries that define the twentieth century and the condition of modern life **The Languages of Landscape** ,1997 Poussin and the Poetics of Painting
