web determinants all mathematical truths are relative and conditional c p steinmetz 4 1 introduction in the previous chapter we have studied about matrices and algebra of matrices we have also learnt that a system of algebraic equations can be expressed in the form of matrices this means a system of linear equations like a $1 \times b$ $1 \times y$ c $1 \times a$ 2

we evaluate the determinant of a 2 2 2 2 matrix if a matrix has the same number of rows and columns we call it a square matrix each square matrix has a real number associated with it called its determinant to find the determinant of the square matrix a b c d a b c d we first write it as a b c d a b c d

web so there are two quantities which can be found in a matrix minors and cofactors minors exist for each element of the matrix and are defined as the determinant of the matrix you get when you ignore the row and column of the element in question for example if my matrix is as follows

web matrix determinants are easy to define and hard to understand so let's start with defining them and introducing related notation in other videos we will learn what they mean and how to use them
