Anaclaudia Gastal Fassa, David L. Parker, Thomas J. Scanlon, 2010-07 Child labour constitutes a major public health concern with estimates that world wide 110 million children aged 5-14 years are engaged in labour that can be described as hazardous or intolerable This book examines both the rights oriented and public health perspectives on child labour A rights approach ensures that exploitative and abusive work is considered not just in terms of a labour market or health rights approach but also in terms of human dignity and the solutions that preserve the rights of children and communities The public health approach is steeped in the relationship between individuals and their community seeking to identify how the presence or absence of government programmes and policies affects those involved The economics perspective is also presented early in the book to aid understanding of the causes and consequences of child labour before the alternate public health and sociological views are presented The editors examine factors such as poverty malnutrition social disadvantage gender globalisation and education and look at both physical and psychological threats This book will be of use to academics and students involved in health health policy social sciences and development disciplines Those actively involved public health initiatives such as policy makers and non governmental organisations will also find this an invaluable resource

disasters and forced government eviction from forest reserves The majority of these displaced communities end up squatting in informal settlements in the nearby urban centres or at the fringes of the forest zone where they are exposed to extreme poverty and deprivation Since almost all the displaced families originate from the rural areas the act of displacement shatters the family based rural economy when they seek refuge in towns Internally displaced children face many risks due to the violence and uncertainty surrounding both their family's flight and their life in the place of refuge This report discusses the findings of the Child Exclusion Survey conducted among the internally displaced in Rift Valley and Nyanza provinces between January 2007 and August 2007 The main objective of the study was to examine the extent of child exclusion among IDPs in Kenya in relation to attaining the ideals of the 1989 Convention on the Rights of the Child and the Millennium Development Goals

including country level accounts for nearly half of the world's nations. Country level essays for more developed nations include historical material in addition to current issues in child labor. All country level essays address specific facets of child labor problems such as industries and occupations in which children commonly work, the national child welfare policy, occupational safety regulations, educational system, and laws, and often highlight significant initiatives against child labor. Current statistical data accompany most country level essays that include ratifications to UN and ILO conventions, the Human Development Index, human capital indicators, economic indicators, and national child labor surveys conducted by the Statistical Information and Monitoring Program on Child Labor. The World of Child Labor is designed to be a self-contained comprehensive reference for high school, college, and professional researchers. Working to Be Someone Beatrice Hungerland, Manfred Liebel, Anne Wihstutz, Brian Milne, 2007-02-15. Discourse on Applied Sociology: Practising perspective Samir Dasgupta, Robyn Bateman Driskell, 2007. This engaging and wide-ranging two-volume study urges a balance between theoretical and practical sociology.

Child Labour Opponents and Their Campaigns in the Americas Nina Schneider, 2025-11-03. This book delves into the past and examines the origins of activism against child labour. It addresses a hitherto under-examined question: how and why did child labour develop into a key concern between the 1880s and 1930s? Who were the protagonists who first raised the issue of child labour as a global concern? The study aims to provide the first account of the history of diverse and locally grounded but nationally and frequently globally connected child labour opponents in the Americas, their motivations and campaigns at the turn of the 20th century. I argue that for the period between 1888 and 1938, one can identify similar protagonists, a joint goal, a broadly similar timing, common platforms, comparable campaigning mechanisms, and many types of connections or entanglements across regions. Nevertheless, in contrast to the global anti-slavery movement, child labour opponents formed a loosely institutionalised network which lacked an international organisation that focused specifically on child labour. A global history approach to child labour opponents helps reveal large-scale patterns across societies and highlight similarities and differences between cases.

Children, Youth, and Development Nicola Ansell, 2005. Children constitute a large part of the population of developing countries. This text considers issues such as education, child labour, street children, child soldiers, refugees, child slaves, and the impact of environmental change and hazards on children.
