different management and marketing journals and to the extent that these issues are addressed at all they have aimed mainly at each separate specific topic at a time. Thus our effort to bring these studies together in the same framework should facilitate our in-depth analysis of these important phenomena.

Behavioral Consequences of Dynamic Pricing David Prakash,2022-08-19 Digital technologies are driving the application of dynamic pricing Today this pricing strategy is used not only for perishable products such as flights or hotel rooms but for almost any product or service category With dynamic pricing retailers frequently adjust their prices over time to respond to factors such as demand their supply and that of competitors or the time of sale Additionally dynamic pricing allows retailers to take advantage of a large share of consumers willingness to pay while avoiding losses from unsold products Ultimately this can lead to an increase in revenue and profit However the application of dynamic pricing comes with great challenges In addition to the technological implementation companies have to take into account that dynamic pricing can cause complex and unintended behavioral consequences on the consumer side The key objective of this dissertation is to provide a deeper understanding of the impact of dynamic pricing on consumer behavior To this end this dissertation presents insights from four perspectives First how reference prices as a critical component in purchase decisions are operationalized Second how customers search for products priced dynamically differentiated by business and private customers as well as by different devices used for the search Third whether and how dynamic pricing influences the impact of internal reference prices on purchase decisions Finally this dissertation demonstrates that consumers perceive price changes as personalized in different purchase contexts leading to reduced perceptions of fairness and undesirable behavioral consequences

Underwriting Commercial Real Estate in a Dynamic Market Christian Redfearn,2019-05-14 A recurrent theme in

Underwriting Commercial Real Estate in a Dynamic Market is that good thinking and good underwriting go together This stands in contrast with getting an answer or even worse reverse engineering getting to a solution by assuming that current trends in market pricing is best The cases in Underwriting Commercial Real Estate in a Dynamic Market will force readers to recognize that there is no single answer but rather a range of answers that will depend on numerous perspectives And in order to make valuation decisions they will have to undertake a rich conversation about what constitutes a good trade off and what does not Cases can be structured for use with introductory material as well as advanced topics

Dynamic Competitive Analysis in Marketing Steffen Jorgensen, Georges Zaccour, 2012-12-06 This volume contains a selection of papers that were presented at the International Workshop on Dynamic Competitive Analysis held in Montr6al Canada September 1 2 1995 The workshop was organized by the editors of the proceedings volume The proceedings contain both full papers and shorter pieces to be considered as work in progress The choice of a rather broad theme for the workshop was deliberate and done in order to attract researchers from different areas of the marketing science community that usually do not get together Obviously a volume like this cannot be exhaustive in the coverage of the dynamics of marketing competition but we are confident that it will convey to the reader an impression of what are the current themes in this field of research The book should be useful to researchers in marketing science applied game theorists graduate students as well as practitioners in marketing with an interest in methods and examples of dynamic competitive analysis
