**Short Sea Shipping in the Age of Sustainable Development and Information Technology** Tiago A. Santos,C. Guedes Soares,2020-04-06 This book provides a thorough understanding of Short Sea Shipping SSS and its role in transport chains presenting a revision of EU policies for SSS Infrastructure and equipment required for the success of SSS are discussed including critical features of modern roll on roll off Ro Ro ships and terminals Models are proposed for the evaluation of transportation demand in SSS including the potential effects of external costs and its results are used within the scope of methods for Ro Ro ship and fleet sizing A discussion of methods used to calculate such costs is provided and a comparison of aggregated demand with and without internalisation of external costs is carried out pointing towards solutions

for greening freight transportation Applications of multi criteria decision making and simulation techniques to supply chains based on SSS are presented The role of information and communication technologies ICT in the promotion of SSS is also discussed A number of case studies illustrate the different research methods and techniques This book is a useful resource for students and researchers studying transportation as well as policymakers and practitioners involved in this field and anyone with an interest in the promotion of environmentally sound transport solutions **The Maritime Transport Crisis**

Hans Jürgen Peters,1993-01-01 Effective planning and management of urban infrastructure is essential to improving the standard of living in rapidly developing urban areas Deterioration or cessation of services can create health risks limit economic productivity damage public and private property and lead to congestion in transport and communications But effective infrastructure services are impossible without adequate records and maps of municipal facilities particularly those underground The authors review recent developments in the recording and mapping of urban infrastructure The paper identifies the institutional organizational and technological issues involved and explores some strategic options for addressing these pressing issues The options discussed include how best to determine the proper institutional structure develop human resources and make the best use of technology The authors perceive an urgent need for development of legal frameworks to make recordkeeping more comprehensive and compatible among various utilities localities and governmental bodies They advise that immediate attention be given to a particular organizational issue in many utilities no one department is responsible for collecting and processing data and even when such responsibility is designated the methods to be used are unclear or the resources are inadequate The paper offers case studies and concludes that improvements in utility mapping and recordkeeping are cost effective enhance the efficiency of the utility and improve the overall quality of urban life *The*

*International Ocean Transport Industry in Crisis* Hans Jürgen Peters,1993 The world s ocean transport industry faces an unprecedented crisis Fundamental changes in the seatriade markets and considerable discrepancies between tonnage supply and the demand for transport are the key reasons The international fleet has become critically overaged and suffers from a deteriorating safety record Serious retrenching and sharp long term planning are needed but hampered by reduced freight earnings rising insurance costs and a shortage of investment capital **Review Of Maritime Transport 2004** ,2005-04-01
