Mercy Under Fire War And The Global Humanitarian Community:

Mercy Under Fire Larry Minear, Thomas G Weiss, 1995-05-07 An examination of the humanitarian practices of private aid agencies international organizations and governments Case studies and examples from around the world are used to support the authors arguments that the global community should make greater efforts at conflict prevention *Darfur and the International Community* Richard Barltrop, 2010-11-30 Darfur has become synonymous with suffering A vast remote and poor region Darfur has been torn by armed conflict and humanitarian crises and haunted by the spectres of ethnic cleansing and genocide After it broke onto the international stage in 2004 and grew into one of the world s worst humanitarian crises the Darfur conflict presented the international community with dramatic challenges How could the international community stop the fighting in Darfur How could it save lives and help the two million people displaced by the conflict And how could the international community or those who wanted to act bring about peace in Darfur and at the same time ensure that the Comprehensive Peace Agreement for the wider war between 1983 and 2005 was implemented Here Richard Barltrop draws on original research inside and outside Sudan including extensive interviews with Sudanese and others who have been involved in Sudan s conflicts politics and peace talks since 1983 and before and official Sudanese and international sources Tracing the history of international responses to the conflicts in Sudan Barltrop investigates what determined the outcomes of international mediation and relief in Sudan He shows that Darfur must be seen within the wider pattern of conflict in Sudan and that both Sudan and the international community have missed opportunities to respond more effectively to the fundamental drivers of conflict in the country As he explains lessons should be drawn from this for Sudan and for the practice of conflict resolution elsewhere in the world today and in the future This ground breaking and insightful book offers crucial analysis for policymakers mediators and humanitarian and development workers as well as students and general readers who wish to deepen their understanding of Africa s largest country and the major political and humanitarian challenges it has posed for the international community

edition was released Draws more widely from other fields such as Business Studies Law and Economics **NGOs and Transnational Networks** William E. DeMars, 2005-04-20 Non Governmental Organisations and their networks are proliferating in all regions of the world They address every transnational issue from population to peace human rights to species rights genocide to AIDS Supporters claim NGOs are effective in achieving their goals while detractors counter that NGO power is paltry compared to governments and corporations Challenging both views DeMars irreverently reveals the political claims implicit in every transnational NGO They are best conceptualised he argues not in terms of either principles or power but through the partners they make in transnational society and politics NGOs and transnational networks institutionalise conflict as much as cooperation and reshape states and societies often inadvertently NGOs have overthrown dictators provided life support for collapsed states and reengineered the family Their historical origins contrast sharply with current realities and show signs of radical change in the future **Aid in Danger** Larissa Fast, 2014-04-03 Humanitarian aid workers increasingly remain present in contexts of violence and are injured kidnapped and killed as a result Since 9 11 and in response to these dangers aid organizations have fortified themselves to shield their staff and programs from outside threats In Aid in Danger Larissa Fast critically examines the causes of violence against aid workers and the consequences of the approaches aid agencies use to protect themselves from attack Based on more than a decade of research Aid in Danger explores the assumptions underpinning existing explanations of and responses to violence against aid workers According to Fast most explanations of attacks locate the causes externally and maintain an image of aid workers as an exceptional category of civilians The resulting approaches to security rely on separation and fortification and alienate aid workers from those in need representing both a symptom and a cause of crisis in the humanitarian system Missing from most analyses are the internal vulnerabilities exemplified in the everyday decisions and ordinary human frailties and organizational mistakes that sometimes contribute to the conditions leading to violence This oversight contributes to the normalization of danger in aid work and undermines the humanitarian ethos As an alternative Fast proposes a relational framework that captures both external threats and internal vulnerabilities By uncovering overlooked causes of violence Aid in Danger offers a unique perspective on the challenges of providing aid in perilous settings and on the prospects of reforming the system in service of core humanitarian values Preventing Deadly Conflict David A. Hamburg, 1998-06 **Human Rights in International Relations** David P. Forsythe, 2000-04-27 This new textbook provides an introduction to human rights in international relations at the turn of the Twenty First Century The book examines the policy making process that establishes and tries to apply human rights norms through the UN regional organizations state foreign policy human rights groups and transnational corporations It documents the many changes in international human rights during the past half century and considers the future of universal human rights Containing chapter by chapter guides to further reading and discussion questions this book will be of interest to undergraduate and graduate students of human rights and their teachers *The International*

Reconciliation Via the War Crimes Tribunal? Aleksandar Fatic, 2019-07-09 First published in 2000 this volume is an examination of the issues of reconciliation after civil wars and the role international war crimes tribunals play in facilitating that reconciliation apart from enforcing justice against perpetrators of war crimes It argues that a war crime tribunal is partial and operates with no regard for the policy purpose of reconciliation is likely to install all opposites of confidence and security in regions infested by civil warfare and that their results will thus be counterproductive and will result in further loss of life and destruction

Purify and Destroy Jacques Semelin, 2007-08-17 How can we comprehend the sociopolitical processes that give rise to extreme violence ethnic cleansing or genocide A major breakthrough in comparative analysis Purify and Destroy demonstrates that it is indeed possible to compare the Holocaust the Rwandan genocide and ethnic cleansing in Bosnia Herzegovina while respecting the specificities of each appalling phenomenon Jacques Semelin achieves this in part by leading his readers through the three examples simultaneously the unraveling of which sometimes converges but most often diverges Semelin's method is multidisciplinary relying not only on contemporary history but also on social psychology and political science Based on the seminal distinction between massacre and genocide Purify and Destroy identifies the main steps of a general process of destruction both rational and irrational born of what Semelin terms delusional rationality He describes a dynamic structural model with at its core the matrix of a social imaginary that responding to fears resentments and utopias carves and recarves the social body by eliminating the enemy Semelin identifies the main stages that can lead to a genocidal process and explains how ordinary people can become perpetrators He develops an intellectual framework to analyze the entire spectrum of mass violence including terrorism in the twentieth century and before Strongly critical of today's political instrumentalization of the genocide notion Semelin urges genocide research to stand back from legal and normative definitions and come of age as a discipline in its own right in the social sciences

individual human behaviors motivations backgrounds and intentions that can form a platform from which to raise and discuss issues of morality and ethics in the modern world **Parameters** ,1996 Saving the Security State Inderpal Grewal,2017-10-27 In Saving the Security State Inderpal Grewal traces the changing relations between the US state and its citizens in an era she calls advanced neoliberalism Marked by the decline of US geopolitical power endless war and increasing surveillance advanced neoliberalism militarizes everyday life while producing the exceptional citizens primarily white Christian men who reinforce the security state as they claim responsibility for protecting the country from racialized others Under advanced neoliberalism Grewal shows others in the United States strive to become exceptional by participating in humanitarian projects that compensate for the security state s inability to provide for the welfare of its citizens In her analyses of microfinance programs in the global South security moms the murders at a Sikh temple in Wisconsin and the post 9 11 crackdown on Muslim charities Grewal exposes the fissures and contradictions at the heart of the US neoliberal empire and the centrality of race gender and religion to the securitized state The Humanitarians David P. Forsythe,2005-08-11 The International Committee of the Red Cross ICRC coordinates the world s largest private relief system for conflict situations Its staff operates throughout the world and in recent years the ICRC has mounted large operations in the Balkans and Somalia Yet despite its very important role its internal workings are mysterious and often secretive This book examines the ICRC from its origins in the mid nineteenth century up to the present day and provides a comprehensive overview of a unique private organisation whose governing body remains all Swiss but which is recognized in international law as if it were an inter governmental organization David Forsythe focuses on the policy making and field work of the ICRC while not ignoring international humanitarian law He explores how it exercises its independence impartiality and neutrality to try to protect prisoners in Iraq displaced and starving civilians in Somalia and families separated by conflict in the Israeli Palestinian conflict David Forsythe received the Distinguished Scholar Award for 2007 from the Human Rights Section of the American Political Science Association International Order and the Politics of Disaster Scott D. Watson,2019-09-02 In this indispensable and comprehensive text Scott D Watson critically examines the current understanding of international order that underpins international disaster management and disaster diplomacy Based on empirical analysis of the three international disaster management regimes disaster relief disaster risk reduction and disaster migration and case studies of disaster diplomacy in the United States Egypt and China Watson argues that international disaster management and disaster diplomacy are not simply efforts to reduce the impact of disasters or to manage bilateral relations but to reinforce key beliefs about the larger international order Challenging the conventional understandings of disasters as natural as exogenous shocks or as unintended and accidental outcomes of the current order this text shows how the ideological foundations of the current heterogenous international order produce recurrent disasters International Order and the Politics of Disaster is a vital source for undergraduate or graduate students interested in international responses to disasters and complex
