## **Mermaids Muse:**

*The Vision of a City* Henry Dumont, 1907      *The Drowned Muse* Anne-Gaëlle Saliot, 2015 *The Drowned Muse* is a study of the extraordinary destiny in the history of European culture of an object which could seem at first glance quite ordinary in the history of European culture. It tells the story of a mask the cast of a young girl's face entitled *L'Inconnue de la Seine* the Unknown Woman of the Seine and its subsequent metamorphoses as a cultural figure. Legend has it that the *Inconnue* drowned herself in Paris at the end of the nineteenth century. The forensic scientist tending to her unidentified corpse at the Paris Morgue was supposedly so struck by her allure that he captured in plaster the contours of her face. This unknown girl also called *The Mona Lisa of Suicide* has since become the object of an obsessive interest that started in the late 1890s, reached its peak in the 1930s and continues to reverberate today. Aby Warburg defines art history as a ghost story for grown ups. This study is similarly a ghost story for grown ups narrating the aura of a cultural object that crosses temporal, geographical and linguistic frontiers. It views the *Inconnue* as a symptomatic expression of a modern world haunted by the earlier modernity of the nineteenth century. It also investigates how the mask's metamorphoses reflect major shifts in the cultural history of the last two centuries, approaching the *Inconnue* as an entry point to understand a phenomenon characteristic of 20th and 21st century modernity: the translatability of media. Doing so, this study mobilizes discourses surrounding the *Inconnue*, casting them as points of negotiation through which we may consider the modern age.      *The Mermaids Point Series* Sarah Bennett, 2024-04-01 Discover the uplifting Mermaid's Point series from bestselling author Sarah Bennett. *Mermaids and the Production of Knowledge in Early Modern England* Tara E. Pedersen, 2016-04-22 We no longer ascribe the term mermaid to those we deem sexually or economically threatening we do not ubiquitously use the mermaid s image in political propaganda or feature her within our houses of worship perhaps most notably we do not entertain the possibility of the mermaid s existence This author Tara Pedersen argues makes it difficult for contemporary scholars to consider the mermaid as a figure who wields much social significance During the early modern period however this was not the case and Pedersen illustrates the complicated category distinctions that the mermaid inhabits and challenges in 16th and 17th century England Addressing epistemological questions about embodiment and perception this study furthers research about early modern theatrical culture by focusing on under theorized and seldom acknowledged representations of mermaids in English locations and texts While individuals in early modern England were under pressure to conform to seemingly monolithic ideals about the natural order there were also significant challenges to this order Pedersen uses the figure of the mermaid to rethink some of these challenges for the mermaid often appears in surprising places she is situated at the nexus of historically specific debates about gender sexuality religion the marketplace the new science and the culture of curiosity and travel Although these topics of inquiry are not new Pedersen argues that the mermaid provides a new lens through which to look at these subjects and also helps scholars think about the present moment methodologies of reading and many category distinctions that are important to contemporary scholarly debates

but are autonomous and have their nature within themselves Hopkins's poetic idiosyncrasy is generated by the parallelism between distinctive and autonomous images which repeat the surprise and ecstasy of the poet contemplating art and nature. He endeavoured to achieve the poetry of inspiration with his emphasis on fancy as the basis of his poetic diction so as to reinstate it as the source of a new Realism. Hopkins's fancy foregrounds the discontinuous nature of a new poetic diction which demonstrates unfettered combinations between autonomous images and signs in metalanguage in advance of semiotic literary theories.

*The Feejee Mermaid and Other Essays in Natural and Unnatural History* Jan Bondeson, 2014-07-02 In his new collection of essays Jan Bondeson tells ten fascinating stories of myths and hoaxes, beliefs and Ripley-like facts concerning the animal kingdom. Throughout he recounts and in some instances solves mysteries of the natural world which have puzzled scientists for centuries. Heavily illustrated with photographs and drawings the book presents astounding tales from across the rich folklore of animals: a learned pig more admired than Sir Isaac Newton by the English public; an elephant that Lord Byron wanted to employ as his butler; a dancing horse whose skills in mathematics were praised by William Shakespeare; and of course the extraordinary creature known as the Feejee Mermaid. This object became the foremost curiosity of London in the 1820s and later in the century toured the United States under the management of P. T. Barnum. Bearing a striking resemblance to a wizened and misshapen monkey with a fishtail the mermaid was nonetheless proclaimed a genuine specimen by experts. Bondeson explores other zoological wonders: toads living for centuries encased in solid stone; little fishes raining down from the sky; and barnacle geese growing from trees until ready to fly. In two of his most fascinating chapters he uncovers the origins of the basilisk, considered one of the most inexplicable mythical monsters, and of the Vegetable Lamb of Tartary. With the head and body of a rooster and the tail of a snake the basilisk was said to be able to kill a person with its gaze. Bondeson demonstrates that belief in this fabulous creature resulted from misinterpretations of rare events in natural history. The vegetable lamb, a mainstay of museums in the seventeenth century, was allegedly half plant, half animal; it had the shape of a little lamb but grew from a stem. After examining two vegetable lambs still in London today, Bondeson offers a new theory to explain this old fallacy.
