Mesic Atoms and Nuclear Structure Young Nok Kim, 1971 **High Energy Physics Research** United States. Congress. Joint Committee on Atomic Energy. Subcommittee on Research, Development, and Radiation, 1965 Reviews purpose objectives and requirements of high energy physics research Includes scientific articles and papers p 393 795 **Hearings and Reports on Atomic Energy** United States. Congress. Joint Committee on Atomic Energy, 1946 **Hearings** United States. Congress. Joint Committee ..., 1968 Progress in Atomic Spectroscopy W. Hanle, 2013-03-09 W HANLE and H KLEINPOPPEN In 1919 in the first edition of *Atombau und Spektrallinien* Sommerfeld referred to the immense amount of information which had been accumulated during the first period of 60 years of spectroscopic practice Sommerfeld emphasized that the names of Planck and Bohr would be connected forever with the efforts that had been made to understand the physics and the theory of spectral lines Another period of almost 60 years has elapsed since the first edition of Sommerfeld's famous monograph As the editors of this monograph *Progress in Atomic Spectroscopy* we feel that the present period is best characterized by the large variety of new spectroscopic methods that have been invented in the last decades Spectroscopy has always been involved in the field of research on atomic structure and the interaction of light and atoms The development of new spectroscopic methods i.e. new as compared to the traditional optical methods has led to many outstanding achievements which together with the increase of activity over the last decades appear as a kind of renaissance of atomic spectroscopy **Atomic Physics 8** I. Lindgren, 2012-12-06 The Eighth International Conference on Atomic Physics was held at Chalmers University of Technology Goteborg Sweden on August 26 1982 Following the tradition established by earlier conferences in the series it was attended by 280 participants from 24 countries A total of 28 invited talks were delivered at the conference These talks which are presented in this volume covered a wide range of topics in atomic physics in a broad sense They extend from very basic problems e.g. the interpretation of quantum mechanics in light of Bell's theorem and the feasibility of relativistic many body calculations to applied problems e.g. laser detection of trace elements and spectroscopy of chemisorbed molecules Professor M Ya Amusia was unable to attend the conference but his invited paper is included here Professor V S Letokhov presented a talk entitled Prospects of Laser Detection of Very Rare Isotopes but was unable to provide a manuscript At the conference 175 posters were presented Abstracts have been published in a separate volume It is very much appreciated that all the 1981 Nobel laureates Nicolaas Bloembergen Arthur Schawlow and Kai Siegbahn were able to attend and deliver their invited talks Professor Schawlow summed up the conference and this too is presented here The conference also benefited considerably from the presence of Professor I I Rabi who gave a much appreciated talk at the conference dinner As this talk was given without a manuscript it could unfortunately not be included here **Nuclear Science Abstracts** , 1975-10 **Energy Research Abstracts** , 1985

Walker,1983 This book covers all aspects of the chemical behaviour of the muon a rare short lived elementary particle having a mass intermediate between that of the proton and the electron Muons provide an exceptional opportunity to investigate basic chemical interactions simply because they are so short lived they can thus be studied using the powerful technique of muon spin rotation in which the yield decay rate and identity of the muon in several different states is observed Although originally of principal interest to nuclear and particle physicists muons have recently become important as probes in solid state physics and in all phases of chemistry This book will be a valuable source of information for research scientists university teachers and graduate students interested in physical chemistry chemical physics and the application of nuclear science to the life sciences **Scientific and Technical Aerospace Reports** ,1982 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **AEC Authorizing Legislation, Fiscal Year 1968** United States.
