*Advances in Archaeological Method and Theory* Michael B Schiffer, 2014-06-30 Advances in Archaeological Method and Theory Volume 5 presents the progressive explorations in methods and theory in archeology This book provides information pertinent to the developments in urban archeology Organized into nine chapters this volume begins with an overview of cultural resource management developed to assess the significance of and to manage the cultural resources on public lands This text then explores the basic aspects of natural and human caused changes on the portion of the archaeological resource base consisting of archaeological

sites Other chapters consider the practice of urban archeology in the United States with emphasis on the relationships between human behavior and material culture in an urban setting This book discusses as well the applications of computer graphics in archeology The final chapter deals with the types of skeletal and population changes that accompany malnutrition This book is a valuable resource for anthropologist archaeologists urban planners and graduate students Archaeological Paleography Joshua D. Englehardt, 2016-01-22 This volume explores the development of the Maya writing system in Middle Late Formative and Early Classic period 700 BC AD 450 Mesoamerica Mesoamerican Archaeology, New Approaches, 1974 Soldiers of the Virgin Kevin Gosner, 1992-07 In the early summer of 1712 a young Maya woman from the village of Cancuc in southern Mexico encountered an apparition of the Virgin Mary while walking in the forest The miracle soon attracted Indian pilgrims from pueblos throughout the highlands of Chiapas When alarmed Spanish authorities stepped in to put a stop to the burgeoning cult they ignited a full scale rebellion Declaring Now there is no God or King rebel leaders raised an army of some five thousand soldiers of the Virgin to defend their new faith and cast off colonial rule Using the trial records of Mayas imprisoned after the rebellion as well as the letters of Dominican priests the local bishop and Spaniards who led the army of pacification Kevin Gosner reconstructs the history of the Tzeltal Revolt and examines its causes He characterizes the rebellion as a defense of the Maya moral economy and shows how administrative reforms and new economic demands imposed by colonial authorities at the end of the seventeenth century challenged Maya norms about the ritual obligations of community leaders the need for reciprocity in political affairs and the supernatural origins of power The first book length study of the Tzeltal Revolt Soldiers of the Virgin goes beyond the conventions of the regional monograph to offer an expansive view of Maya social and cultural history With an eye to the contributions of archaeologists and ethnographers Gosner explores many issues that are central to Maya studies including the origins of the civil religious hierarchy the role of shamanism in political culture the social dynamics of peasant corporate communities and the fate of the native nobility after the Spanish conquest Teotihuacan and Early Classic Mesoamerica Claudia García-Des Lauriers, Tatsuya Murakami, 2022-02-14 The Early Classic period in Mesoamerica has been characterized by the appearance of Teotihuacan related material culture throughout the region Teotihuacan known for its monumental architecture and dense settlement became an urban center around 100 BC and a regional state over the next few centuries dominating much of the Basin of Mexico and beyond until its collapse around AD 650 Teotihuacan and Early Classic Mesoamerica explores the complex nature of Teotihuacan s interactions with other regions from both central and peripheral vantage points The volume offers a multiscalar view of power and identity showing that the spread of Teotihuacan related material culture may have resulted from direct and indirect state administration colonization emulation by local groups economic transactions single event elite interactions and various kinds of social and political alliances The contributors explore questions concerning who interacted with whom what kinds of materials and ideas were exchanged what role interregional interactions played in the

creation transformation and contestation of power and identity within the city and among local polities and how interactions on different scales were articulated The answers to these questions reveal an Early Classic Mesoamerican world engaged in complex economic exchanges multidirectional movements of goods and ideas and a range of material patterns that require local regional and macroregional contextualization Focusing on the intersecting themes of identity and power Teotihuacan and Early Classic Mesoamerica makes a strong contribution to the understanding of the role of this important metropolis in the Early Classic history of the region The volume will be of interest to scholars and graduate students of Mesoamerican archaeology the archaeology of interaction and the archaeology of identity Contributors Sarah C Clayton Fiorella Fenoglio Lim n Agapi Filini Julie Gazzola Sergio Gomez Chavez Haley Holt Mehta Carmen Perez Patricia Plunket Juan Carlos Saint Charles Zetina Yoko Sugiura Gabriela Uru uela Gustavo Jaimes Vences      *Telling Maya Tales* Gary H. Gossen, 2013-12-02 Telling Maya Tales offers an experimental ethnographic portrait of the San Juan Chamula the largest and most influential Maya community of Highland Chiapas in the late twentieth century the era of the Zapatistas In this collection of essays the author whose field work in the area spans two generations of anthropological thought explores several expressions of Tzotzil ethnic affirmation ranging from oral narrative to ritual drama and political action His work covers the current era when the Chamula Tzotzils mingle chaotically and sometimes violently with the social and political space of modern Mexico most recently in the context of the Maya Zapatista movement of 1994      **The Power of Feasts** Brian Hayden, 2014-09-29 In this book Brian Hayden provides the first comprehensive theoretical work on the history of feasting in pre industrial societies As an important barometer of cultural change feasting is at the forefront of theoretical developments in archaeology The Power of Feasts chronicles the evolution of the practice from its first perceptible prehistoric presence to modern industrial times This study explores recurring patterns in the dynamics of feasts as well as linkages to other aspects of culture such as food personhood cognition power politics and economics Analyzing detailed ethnographic and archaeological observations from a wide variety of cultures including Oceania and Southeast Asia the Americas and Eurasia Hayden illuminates the role of feasts as an invaluable insight into the social and political structures of past societies      *The Great Maya Droughts in Cultural Context* Gyles Iannone, 2014-03-15 In The Great Maya Droughts in Cultural Context contributors reject the popularized link between societal collapse and drought in Maya civilization arguing that a series of periodic collapses including the infamous Terminal Classic collapse AD 750 1050 were not caused solely by climate change related droughts but by a combination of other social political and environmental factors New and senior scholars of archaeology and environmental science explore the timing and intensity of droughts and provide a nuanced understanding of socio ecological dynamics with specific reference to what makes communities resilient or vulnerable when faced with environmental change Contributors recognize the existence of four droughts that correlate with periods of demographic and political decline and identify a variety of concurrent political and social issues They argue that these primary underlying factors were exacerbated by drought

conditions and ultimately led to societal transitions that were by no means uniform across various sites and subregions They also deconstruct the concept of collapse itself although the line of Maya kings ended with the Terminal Classic collapse the Maya people and their civilization survived The Great Maya Droughts in Cultural Context offers new insights into the complicated series of events that impacted the decline of Maya civilization This significant contribution to our increasingly comprehensive understanding of ancient Maya culture will be of interest to students and scholars of archaeology anthropology geography and environmental studies Exploring Ancient Skies David H. Kelley,Eugene F. Milone,2005-12-06 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 the lion horoscope or the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history **Visionary** Graham Hancock,2022-04-04 The latest archaeology and history redefining book from bestselling author Graham Hancock Fingerprints of the Gods who is featured in Ancient Apocalypse a hit Netflix original docuseries With the original unabridged text of Supernatural I offer the reader an investigation that explores the human experience with psychedelics from the Stone Age to the Space Age and the role of these extraordinary plant medicines as tools to investigate the nature of reality itself Graham Hancock Discover the pathway to the gods Less than 50 000 years ago mankind had no art no religion no sophisticated symbolism no innovative thinking Then in a dramatic and electrifying change described by scientists as the greatest riddle in human history all the skills and qualities that we value most highly in ourselves appeared already fully formed as though bestowed on us by hidden powers In Visionary Graham Hancock sets out to investigate this mysterious before and after moment and to discover the truth about the influences that gave birth to modern human mind His quest takes him on a journey of adventure and detection from the stunningly beautiful painted caves of prehistoric France Spain and Italy to remote rock shelters in the mountains of South Africa where he finds a treasure trove of extraordinary Stone Age art Hancock uncovers clues that lead him to travel to the depths of the Amazon rainforest to drink the powerful plant hallucinogen ayahuasca with Indian shamans whose paintings contain images of supernatural beings

identical to the animal human hybrids depicted in prehistoric caves and rock shelters Hallucinogens such as mescaline also produce visionary encounters with exactly the same beings Scientists at the cutting edge of consciousness research have begun to consider the possibility that such hallucinations may be real perceptions of other dimensions Could the supernaturals first depicted in the painted caves and rock shelters be the ancient teachers of mankind Could it be that human evolution is not just the blind meaningless process that Darwin identified but something more purposive and intelligent something that we have barely even begun to understand Previously published as Supernatural this definitive edition includes a new Introduction by Graham Hancock as well as restored chapters that were omitted from the original paperback release

Pathways to Complexity M. Kathryn Brown, George J. Bey III, 2021-04-27 Pathways to Complexity synthesizes a wealth of new archaeological data to illuminate the origins of Maya civilization and the rise of Classic Maya culture In this volume prominent Maya scholars argue that the development of social religious and economic complexity began during the Middle Preclassic period 1000 300 B C hundreds of years earlier than previously thought Contributors reveal that villages were present in parts of the lowlands by 1000 B C challenging the prevailing models estimating when civilization took root in the area Combining recent discoveries from the northern lowlands an area often neglected in other volumes and the southern lowlands the collection then traces the emergence of sociopolitical inequality and complexity in all parts of the Yucatan peninsula over the course of the Middle Preclassic period They show that communities evolved in different ways due to influences such as geographical location ceramic exchange shell ornament production agricultural strategy religious ritual ideology and social rankings These varied pathways to complexity developed over half a millennium and culminated in the institution of kingship by the Late Preclassic period Presenting exciting work on a dynamic and poorly understood time period Pathways to Complexity demonstrates the importance of a broad comparative approach to understanding Preclassic Maya civilization and will serve as a foundation for future research and interpretation Contributors M Kathryn Brown Dr George Bey III Tara Bond Freeman Fernando Robles Castellanos Tomas Gallareta Negron E Wyllys Andrews V Anthony Andrews David S Anderson Lauren Sullivan Jaime J Awe James F Garber Mary Jane Acu a William Saturno Bobbi Hohmann Terry Powis Paul Healy Richard Hansen Donald W Forsyth David Freidel Barbara Arroyo Richard E W Adams A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase
