**The Early History of the Ancient Near East, 9000-2000 B.C.** Hans J. Nissen, Kenneth J. Northcott, 2011-03-04 Hans J Nissen here provides a much needed overview of 7000 years of development in the ancient Near East from the beginning of settled life to the formation of the first regional states His approach to the study of Mesopotamian civilization differs markedly from conventional orientations which impose a sharp division between prehistoric and historic literate periods Nissen argues that this approach is too rigid to explain the actual development of that civilization He deemphasizes the invention of writing as a turning point viewing it as simply one more phase in the evolution of social complexity and as the result of specific social economic and political factors With a unique combination of material culture analysis written data Nissan traces the emergence of the earliest isolated settlements the growth of a network of towns the emergence of city states and finally the appearance of territorial states From his synthesis of the prehistoric and literate periods comes a unified picture of the development of Mesopotamian economy society and culture Lavishly illustrated The Early History of the Ancient Near East 9000 2000 B C is an authoritative work by one of the most insightful observers of the evolution and character of Mesopotamian civilization

**Ancient Mesopotamia: Exploration & Discovery Facts And Picture Book For Children** Bold Kids, 2022-03-07 When you re planning a field trip or looking for fun facts about ancient Mesopotamia keep these points in mind The region was a prime location for human settlement and was near the Euphrates and Tigris rivers Its geography and good weather conditions made it an excellent place to build cities so the region was the perfect

place to develop the earliest civilizations The area was populated for over a million years and was the site of several empires Many people who lived in this region developed advanced civilizations including the first known urban civilizations Sumer was the heartland of ancient Mesopotamia and the city of Eridu is considered the first city in the world The Mesopotamian civilization was highly advanced and had many achievements It was one of the earliest civilisations to adopt writing and was home to the earliest human communities This civilization was also the cradle of the Neolithic Revolution which began around 10 000 BC During this time the human race made great strides and developed the first written language cursive script and mathematics The first written works were created in Mesopotamia The Akkadian Empire was the first multi national realm in history Enheduanna the daughter of Sargon the Great is the first author known by name The palace in Mari had over 20 000 cuneiform tablets and the library was one of the best in the region Assyrian Kingdoms spread and fought each other in an effort to conquer the area The Gutu Tribe took over and dominated the politics of Mesopotamia for more than a thousand years

**Cultural Atlas of Mesopotamia and the Ancient Near East** Michael Roaf,1996 **Mesopotamia and Iran in the Persian Period, Conquest and Imperialism, 539-331 BC** John Curtis,1997 This volume publishes the papers presented at the Lukonin Memorial Seminar held at the British Museum in July 1995 Five scholars spoke on different aspects of the history and culture of Mesopotamia and Iran during the period of Achaemenid rule between 539 BC and 331 BC Babylon Charles River Editors,2025-05-02 The ancient world was full of many fantastic cities and places and like today s major cities the great ancient cities were hubs of trade religion and science Writing was first invented in ancient cities and many important scientific discoveries were also made in them some of which are still used in the modern world Among the many cities of the ancient world Rome and Athens may come to mind first but the city of Babylon in the land of Mesopotamia was already an ancient venerated city when the others were still inconsequential settlements Today Babylon has become a byword for greed excess and licentiousness mostly due to its mention in the Bible but a closer examination reveals that Babylon was so much more and even perhaps the most important city in the ancient world Ancient Babylon was home to great dynasties that produced some of the world s most influential leaders most notably Hammurabi and Nebuchadnezzar and these rulers invoked their wills on the entire ancient Near East and have been remembered as both progressive and cruel all at the same time Babylon was also the seat of culture in ancient Mesopotamia and the place where scholars made amazing scientific advances that would not be eclipsed for several centuries An examination of ancient Babylon demonstrates that it was truly the first great city in the ancient world Of course the sheer span of history between Babylon s power and today has produced plenty of historical questions and controversy One of the things people most closely associate Babylon with is the Hanging Gardens which like the Great Pyramid of Giza were considered both a technological marvel and an aesthetic masterpiece Ancient historians believed that the Hanging Gardens were constructed around the 7th century B C

after the second rise of Babylon which would make them the second oldest of the Seven Wonders of the Ancient World and they were reputedly created by the biblical Nebuchadnezzar II the king who conquered Judea to please his homesick wife after the model of Egyptian pleasure gardens However in 1993 British Assyriologist Stephanie Dalley proposed a theory that the Hanging Gardens were ordered built by the Assyrian King Sennacherib a century earlier for his giant palace at Nineveh instead She believed that the two sites were easily confused by ancient sources resulting in the Gardens being incorrectly located in Babylon a century later Babylon was also instrumental in the development of the region's religions Ancient Mesopotamian religion continues to captivate people for many of the same reasons today's best known religions and their histories fascinate people The religion practiced by the Ancient Mesopotamians provides a certain mix between the mundane and the surreal and at the same time aspects of it are both familiar and bizarre to people today Some find themselves drawn to it based on its preeminent position in religious history as the oldest documented religion in the world Others become fascinated with the close connections between some of the Mesopotamian religious texts which include a flood story a creation story and a story of the righteous sufferer and their parallels in the Hebrew Bible Today the Ancient Mesopotamians and their religion are a source of curiosity but thousands of years ago the religion was an integral part of their lives From their birth to their death deities surrounded them and whether their social interactions were on the level of a smaller city or that of a larger nation state deities played key roles in the social fabric of their society In fact the people and religion were so intertwined that a study of Ancient Mesopotamian religion is a study of Ancient Mesopotamian culture

*The Ancient Mesopotamian City* Marc Van De Mieroop, 1997-11-13 Urban history starts in ancient Mesopotamia In this volume Marc Van De Mieroop examines the evolution of the very earliest cities which for millennia inspired the rest of the ancient world The city determined every aspect of Mesopotamian civilization and the political and social structure economy literature and arts of Mesopotamian culture cannot be understood without acknowledging their urban background Urban history starts in ancient Mesopotamia the earliest known cities developed there as the result of long indigenous processes and for millennia the city determined every aspect of Mesopotamian civilization Marc Van De Mieroop examines urban life in the historical period investigating urban topography the role of cities as centres of culture their political and social structures economy literature and the arts He draws on material from the entirety of Mesopotamian history from c 3000 to 300 BC and from both Babylonia and Assyria arguing that the Mesopotamian city can be regarded as a prototype that inspired the rest of the ancient world and shared characteristics with the European cities of antiquity
