Astrology Volume I Nicholas Campion,2008-04-17 **Mesopotamian Planetary Astronomy-Astrology** David Brown,2021-10-25 Pliny wrote of Babylon that here the creator of the science of astronomy was Excavations have shown this statement to be true This book argues that the earliest attempts at the accurate prediction of celestial phenomena are indeed to be found in clay tablets dating to the 8th and 7th centuries BC from both Babylon and from Nineveh The author carefully situates this astronomy within its cultural context treating all available material from the relevant period and also analysing the earlier astrological material and the later well known ephemerides and related texts A wholly new approach to cuneiform astral concerns emerges one in which both celestial divination and the later astronomy are shown to be embedded in a prevailing philosophy dealing with the ideal nature of the early universe and in which the dynamics of the celestial divination industry that surrounded the last Assyrian monarchs account for no less than the first recorded scientific revolution This work closely adheres to the original textual sources and argues for the evolution on the basis of the needs of the ancient scholars and the internal logic of the divinatory and predictive systems employed To this end it offers for the first time a Mesopotamian contribution to the philosophy and not only the history of science *Zodiac Calendars in the Dead Sea Scrolls and Their Reception* Helen R. Jacobus,2014-10-30 The ancient mathematical basis of the Aramaic calendars in the Dead Sea Scrolls is analysed in this investigation Helen R Jacobus re examines an Aramaic zodiac calendar with a thunder divination text 4Q318 and the calendar from the Aramaic Astronomical Book 4Q208 4Q209 all from Qumran Jacobus demonstrates that 4Q318 is an ancestor of the Jewish calendar today and that it helps us to understand 4Q208 4Q209 She argues that these calendars were taught in antiquity as angelic knowledge described in 1 Enoch and the Book of Jubilees The study also encompasses Babylonian Hellenistic Byzantine astronomy and astrology and classical and Jewish writings Finally a medieval Hebrew zodiac calendar related to 4Q318 with an astrological text is published here for the first time *The Cosmic Storyteller: Unraveling the Mysteries of Astrology* Pasquale De Marco,2025-05-20 Embark on a celestial journey with The Cosmic Storyteller Unraveling the Mysteries of Astrology a book that unveils the ancient wisdom and profound insights hidden within the stars This comprehensive guide to astrology delves into its historical roots scientific foundations and practical applications offering a fresh perspective on this fascinating field Written with clarity and passion The Cosmic Storyteller dispels common misconceptions and explores the rich tapestry of astrology revealing its ability to provide insights

considers astrology's relation to modernity and draws on extensive fieldwork and interviews with leading modern astrologers to present an invaluable contribution to our understanding of the origins and nature of New Age ideology. This book challenges the notion that astrology is either marginal or a feature of postmodernism. Concluding that astrology is more popular than the usual figures suggest, Campion argues that modern astrology is largely shaped by New Age thought influenced by the European Millenarian tradition that it can be seen as an heir to classical Gnosticism and is part of the vernacular religion of the modern west.

Esarhaddon, King of Assyria Josette Elayi, 2023-02-15 Esarhaddon King of Assyria continues Josette Elayi's narrative journey through the lives of the kings of the Neo Assyrian Empire. Using both archaeological and textual evidence, Elayi examines the contentious circumstances surrounding Esarhaddon's accession to the throne in 681 BCE, his rebuilding of Babylon which had been destroyed by his father Sennacherib, his successful campaigns in Media, the Arabian Peninsula, Anatolia, the Caucasus, and the Levant, and his ultimate achievement: the conquest of Egypt in 671 BCE. Throughout, Elayi presents a rich portrait of this enigmatic figure whose short but impactful reign was plagued by chronic illness and a complex and ultimately fatal relationship with his court officials. Yet through it all, Esarhaddon emerges as one of the most scholarly and most politically successful kings of the empire.

Historical Dictionary of Mesopotamia Gwendolyn Leick, 2003 The Historical Dictionary of Mesopotamia covers one of the oldest civilizations in history. Astral Sciences in Mesopotamia Hermann Hunger, David Pingree, 2015-11-02 Astronomy and astrology or the astral sciences played an enormous if not a key role in the political and religious life of the Ancient Near East and later of the Greek and Roman world. This is the first comprehensive and up-to-date account of the origins of the astral sciences in the Ancient Near East. Every type of Sumerian or Akkadian text dealing with descriptive or mathematical astronomy, including many individual tablets, are thoroughly dealt with. All aspects such as the history of discovery, reconstruction, and interpretation come to the fore, accompanied by a full bibliography. At that, the reader will find descriptions of astronomical contents, an explanation of their scientific meaning, and the place a given genre or tablet has in the development of astronomy both within the Mesopotamian culture and outside of it. Because celestial omens are intimately related to astronomy in Mesopotamian science, these are also discussed extensively. The material is arranged both chronologically and thematically so as to help make *Astral Sciences in Mesopotamia* a reference work on the subject in its truest sense.
