Mannoia, 2023-01-01 La circolazione del mottetto italiano in Germania nel corso del Seicento ha interessato ampiamente la musicologia internazionale sin dagli inizi del Novecento. Gli approcci proposti sono stati numerosi e hanno messo in luce aspetti diversi della complessa fenomenologia della ricezione del mottetto italiano. In larga parte l'attenzione si è scrupolosamente concentrata su specifici testimoni oppure su alcune tradizioni locali. Questo volume giunge a completare parte di questi studi e indaga in maniera sistematica secondo un approccio alternativo il processo di compilazione e produzione delle trentasette antologie tedesche a stampa dedicate esclusivamente o in gran parte alla trasmissione del mottetto italiano per ampio organico e a poche voci nella loro forma originale oppure adattato alle necessità devozionali e alle capacità musicali della comunità cui il singolo volume o collana era rivolto. I volumi qui commentati fornirono alle comunità transalpine uno sguardo critico e selettivo sulla musica sacra italiana. Con sguardo altrettanto critico le stesse antologie sono qui oggetto di analisi e contestualizzazione storica e culturale. Il contenuto di ogni volume indagato diacronicamente con l'intento di evidenziare come ogni mottetto sia stato adattato e aggiornato trovando la sua fondatezza scientifica nella teoria dei diasistemi di Cesare Segre secondo cui quasi nessun testo indenne alla lettura interpretativa di chi lo copia o compila.

musique de la chambre to Louis XIII has long been known as one of the most important composers active in early seventeenth century France but until recently he was believed to have produced only secular airs de cour. This edition presents for the first time Boeset's newly identified sacred works: a repertory of some seventy compositions for the nuns of the Royal Abbey of Montmartre, Paris. Scored for multiple high voices, bass and basse continue, Boeset's works include three complete mass ordinary settings, through-composed and alternatim. Te Deums and Magnificats, again both through-composed and alternatim, psalms and a number of motets for important feasts and ceremonies at Montmartre. Montmartre was also one of the first religious houses to adopt so-called plain chant musical, a type of newly composed or modified chant. Several works of

the edition make particular use of this kind of chant most notably the alternatim hymn settings which use unusual metered versions of the newly composed hymn chants in alternation with the polyphony Boesset's compositions for Montmartre represent by far the largest single repertory of sacred music from the reign of Louis XIII and while not showing the influence of the newest Italian practices nevertheless anticipate several of the musical techniques previously associated with Henri Dumont in particular the use of the basse continue These works thus fill a significant gap in our understanding of musical developments in seventeenth century France and demonstrate that sacred music of the highest quality emerged during a period that scholars have long dismissed as being of little interest
