This Open access book offers a pivotal contribution to the field of financial literacy research as it advances the understanding of financial literacy as a holistic competence encompassing cognition, motivation, emotion, attitude, behaviour and their interrelationships. It provides a comprehensive overview and evaluation of concepts, constructs and frameworks related to financial literacy and instruments used to measure financial competence. The work also discusses identification, synthesis and systematisation of a wide range of cognitive and non-cognitive influences on financial behaviour. The book not only introduces a unique holistic model of financial competence but also presents a draft of an innovative technology-based test instrument designed to simulate and trace complex financial decision-making processes and elucidate challenges confronted in complex problem-solving situations. The aim of this book is to shift from an isolated focus on individual cognitive facets, mainly knowledge, to a holistic modeling of competence in order to systematise the landscape of research on financial literacy and
