Turner,2006-05-17 Sociology is experiencing what can only be described as hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn t usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these these theories are diverse and represent the prominent theoretical discussions in sociology today Some areas included are Section I Theoretical Methodologies and Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change SectionVII Theorizing from Assumptions of Rationality This handbook will be of interest to those wanting a broad spectrum and overview of late 20th early 21st century sociological theory *Learn to Write Badly* Michael Billig,2013-06-20 Modern academia is increasingly competitive yet the writing style of social scientists is routinely poor and continues to deteriorate Are social science postgraduates being taught to write poorly What conditions adversely affect the way they write And which linguistic features contribute towards this bad writing Michael Billig s witty and entertaining book analyses these questions

in a quest to pinpoint exactly what is going wrong with the way social scientists write Using examples from diverse fields such as linguistics sociology and experimental social psychology Billig shows how technical terminology is regularly less precise than simpler language He demonstrates that there are linguistic problems with the noun based terminology that social scientists habitually use reification or nominalization rather than the corresponding verbs reify or nominalize According to Billig social scientists not only use their terminology to exaggerate and to conceal but also to promote themselves and their work

understanding of both our present debates on post secularity as well as our modernist past both of which were thoroughly shaped by their reflections and critiques on the notion of belief yet failed to enter into any sort of meaningful communication with each other This book seeks to rectify this failure by introducing the concept of belief languages an anthropological framework designed to historicize different discussions on belief and allow for their comparative description and analysis
