Sustainable Earth serves the increasing interest in metal resources especially the critical and strategic metals which are essential commodities for the green energy transition The opening chapters introduce the heterogeneous distribution of metal resources as well as the industrial use of metals The main chapters then work systematically through abundant metal systems scarce critical metal systems rare critical metal systems trace critical metal systems and precious metal systems The book wraps with a close examination of temporal distribution of mineral resources and an insightful discussion of the future of mineral resources Researchers and engineers in economic geology and mining and exploration industries will find themselves returning to this key reference for years to come Describes how mineable and economic metal concentrations form and are preserved in the Earth's upper crust Explores how they are discovered by systematic mineral exploration at a variety of scales Discusses how to educate the public on the scarcity of natural metal resources and the issues concerning the nexus between the energy transition and potential exhaustion of critical metals

A Joint Venture Agreement for Seabed Mining G. Jaenicke, 2013-11-11 The Third United Nations Conference on the Law of the Sea is preparing rules for the establishment of an international legal regime governing the exploration and exploitation of the resources of the international seabed The Draft Convention on the Law of the Sea Informal Text of 27 August 1980 which has so far been the result of the negotiations during the preceding sessions of the Conference provides for a so called parallel system under which an international Enterprise as well as national private or state owned companies will be granted access to the resources of the international seabed under the control of an International Seabed Authority The Draft Convention also envisages the conclusion of joint venture agreements between the international Enterprise and national companies or consortia and encourages such cooperation through granting various incentives Such joint ventures will probably play an important part in making the international Enterprise operative in the early years of its existence At the Conference concerns have been expressed whether and when the Enterprise as a newcomer would be in a position to start seabed mining and to compete effectively with the national companies The Draft Convention provides for a number of ways and means to enable the Enterprise to develop its technological and financial capabilities for deep sea mining as early as possible
