approaches first followed by specific applications that can be immediately implemented in the field Presents 16 case studies that allow readers to quickly apply exploration concepts to real life scenarios in the field Includes more than 200 illustrations and full color photographs that aid the reader in retaining key procedures and applications Each chapter is structured so that its topic is discussed theoretically first followed by specific applications Combines both theory and application in a multidisciplinary reference that thoroughly addresses the full scope of mineral exploration Authored by an instructor with more than 30 years of experience in the field and a decade as a consultant for commercial mining companies     *Scientific American* ,1904     **United States Customs Court Reports** United States.
