Schreiner, C. Guminski, Z. Galus, 2013-10-22 Intermetallic Compounds in Mercury is Volume 51 of the Solubility Data Series It follows Volume 25 Metals in Mercury of the same series Evaluations of more than fifty systems are presented together with all of the data and citations from the original literature In addition over 200 references are given to related literature that describes metal interactions in amalgams but from which quantitative information can only be inferred For each compound reported a critical evaluation presents recommended or tentative values of solubilities or solubility products based on statistical treatment of the data reported Mercury provides a unique solvent for metal metal reactions and thus the data reported here are a valuable addition to the experimental basis for better fundamental understanding of interactions of metals in the elemental state In addition this material is important technologically in the areas of metal processing materials and electrochemistry **Solubility Data Series** R.W. Cargill, 2013-10-22 This volume in the Solubility Data Series contains

tabulated collections and critical evaluations of original data for the solubility of carbon monoxide in a variety of liquid solvents The solvents include water aqueous and non aqueous salt solutions a variety of hydrocarbons a variety of oxygen containing halogen containing sulfur containing and nitrogen containing organic compounds and also some biological fluids with which carbon monoxide has an important interaction The data were gathered from a search of the world s chemical literature through to the end of 1988 and make up a unique and valuable historical survey of the solubility of carbon monoxide Their publication is timely in view of current concern about carbon monoxide as an atmospheric pollutant and in view of the role which carbon monoxide is likely to play in the future as chemical feedstocks may have to change in response to supply and demand patterns and as alternative energy sources are developed especially coal gasification technology For all of these applications and for numerous others this volume of well documented and critically evaluated gas solubility data will be of tremendous benefit Mercury in Liquids, Compressed Gases, Molten Salts and Other Elements H.
