Metaphor In Context:

Metaphor in Use Fiona MacArthur, José Luis Oncins-Martínez, Manuel Sánchez-García, Ana María Piquer-Píriz, 2012-10-17 Metaphor is a fascinating phenomenon but it is also complex and multi faceted varying in how it is manifested in different modes of expression languages cultures or time scales How then can we reliably identify metaphors in different contexts How does the language or culture of speakers and hearers affect the way metaphors are produced or interpreted Are the methods employed to explore metaphors in one context applicable in others The sixteen chapters that make up this volume offer not only detailed studies of the situated use of metaphor in language gesture and visuals around the world providing important insights into the different factors that produce variation but also careful explication and discussion of the methodological issues that arise when researchers approach metaphor in diverse real world contexts The book constitutes an important contribution to applied metaphor studies and will prove an invaluable resource for the novice and experienced metaphor researcher alike

Contexts of Metaphor Michiel Leezenberg, 2021-10-01 This study presents an approach to metaphor that systematically takes contextual factors into account It analyses how metaphors both depend on and change the context in which they are uttered and specifically how metaphorical interpretation involves the articulation of asserted implied and presupposed material It supplements this semantic analysis with a practice based account of metaphor at the conceptual level which stresses the role of sociocultural factors in concept formation

Metaphor in Context Josef Stern, 2000-11-08 Josef Stern addresses the question Given the received conception of the form and goals of semantic theory does metaphorical interpretation in whole or part fall within its scope The many philosophers linguists and cognitive scientists writing on metaphor over the past two decades have generally taken for granted that metaphor lies outside if not in opposition to received conceptions of semantics and grammar Assuming that metaphor cannot be explained by or within semantics they claim that metaphor has little if anything to teach us about semantic theory In this book Josef Stern challenges these assumptions He is concerned primarily with the question Given the received conception of the form and goals of semantic theory does metaphorical interpretation in whole or part fall within its scope Specifically he asks what if anything does a speaker hearer know as part of her semantic competence when she knows the interpretation of a metaphor According to Stern the answer to these questions lies in the systematic context dependence of metaphorical interpretation Drawing on a deep analogy between demonstratives indexicals and metaphors Stern develops a formal theory of metaphorical meaning that underlies a speaker's ability to interpret a metaphor With his semantics he also addresses a variety of philosophical and linguistic issues raised by metaphor These include the interpretive structure of complex extended metaphors the cognitive significance of metaphors and their literal paraphrasability the pictorial character of metaphors the role of similarity and exemplification in metaphorical interpretation metaphor networks dead metaphors the relation of metaphors to other figures and the dependence of metaphors on literal meanings Unlike most metaphor theorists however who take these problems to

be sui generis to metaphor Stern subsumes them under the same rubric as other semantic facts that hold for nonmetaphorical language

Where Metaphors Come From Zoltán Kövecses, 2015-02-12 Kövecses recasts CMT as a contextual theory of metaphor expanding and refining it to account for the ways in which many verbal metaphors are tied to context

Metaphor Zoltan Kovecses, 2010-03-12 Combining up to date scholarship with clear and accessible language and helpful exercises Metaphor A Practical Introduction is an invaluable resource for all readers interested in metaphor This second edition includes two new chapters on metaphors in discourse and metaphor and emotion along with new exercises responses to criticism and recent developments in the field and revised student exercises tables and figures

Visual Metaphors Réka Benczes, Veronika Szelid, 2022-09-15 Whenever we think about the world including its concrete and abstract entities we typically see a series of so called mental images in front of our eyes that aid us in everyday problem solving and navigating ourselves in the world Visual metaphors similarly to their linguistic counterparts largely build on such images Nevertheless the interplay of metaphorical metonymical text and imagery is not necessarily and not usually straightforward and raises complex theoretical and methodological questions The eleven chapters in this collection address a wide range of such challenges such as what are visual metaphors in the first place how can they be identified what is their relationship to linguistic metaphors what are their most common manifestations what knowledge structures are required for their interpretation and how do they interact with metonymies The studies cut across linguistics politics philosophy poetry art and history highlighting the ubiquitous role that visual metaphor plays in everyday life and conceptualizations Originally published as special issue of Cognitive Linguistic Studies 7 1 2020

Context as Other Minds Talmy Givón, 2005-01-01 Givón's new book recasts pragmatics and most conspicuously the pragmatics of sociality and communication in neuro cognitive bio adaptive evolutionary terms The fact that context the core notion of pragmatics is a framing operation undertaken on the fly through judgements of relevance has been well known since Aristotle Kant and Peirce But the context that is relevant to the pragmatics of sociality and communication is a highly specific mental operation the mental modeling of the interlocutor's current rapidly shifting belief and intention states The construed context of social interaction and communication is thus a mental representation of other minds Following a condensed intellectual history of pragmatics the book investigates the adaptive pragmatics of lexical semantic categories the 1st order framing of reality what cognitive psychologists call semantic memory Utilizing the network model the book then takes a fresh look at the adaptive underpinnings of metaphoric meaning The core chapters of the book outline the re interpretation of communicative context as the systematic on line construction of mental models of the interlocutor's current rapidly shifting states of belief and intention This grand theme is elaborated through examples from the grammar of referential coherence verbal modalities and clause chaining In its final chapters the book pushes pragmatics beyond its

traditional bounds surveying its interdisciplinary implications for philosophy of science theory of personality personality disorders and the calculus of social interaction

Metaphors of ANGER across Languages: Universality and Variation Zoltan Kövecses, Réka Benczes, Veronika Széld, 2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions Although it has received considerable scholarly attention in a number of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context

The Pauline Metaphors of the Holy Spirit Erik Konsmo, 2010 In the Pauline literature of the New Testament the characteristics of the Spirit and Christian life are described through the use of metaphor An interpreter of Paul must understand his metaphors in order to arrive at a complete understanding of the Pauline pneumatological perspective Thus The Pauline Metaphors of the Holy Spirit examines how the Pauline Spirit metaphors express the intangible Spirit's tangible presence in the life of the Christian Rhetoricians prior to and contemporary with Paul discussed the appropriate usage of metaphor Aristotle's thoughts provided the foundation from which these rhetoricians framed their arguments In this context The Pauline Metaphors surveys the use of metaphor in the Greco Roman world during the NT period and also studies modern approaches to metaphor The modern linguistic theories of substitution comparison and verbal opposition are offered as representative examples as well as the conceptual theories of interaction cognitive linguistic and the approach of Zoltan Kövecses In examining these metaphors it is important to understand their systematic and coherent attributes These can be divided into structural orientational and ontological characteristics which are rooted in the conceptual approach of metaphor asserted by George Lakoff and Mark Johnson This book evaluates these characteristics against each of the Pauline Spirit metaphors

Metaphor, Nation and Discourse Ljiljana Šarić, Mateusz-Milan Stanojević, 2019-05-20 This edited volume examines how metaphors and related phenomena metonymies symbols cultural models stereotypes lead to the discursive construal of a common element that brings the nation together The central idea is that metaphor use must be questioned to lay bare the processes and the discursive power behind them The chapters examine a range of contemporary and historical monomodal and multimodal discourses including politicians discourse presidential speeches newspapers TV series Catholic homilies colonialist discourse

and various online sources The approaches taken include political science international relations cultural studies and linguistics All contributions feature discursive constructivist views of metaphor with clear sociocultural grounding and the notion of metaphor as a framing device in constructing various aspects of nations and national identity The volume will appeal to scholars in discourse analysis metaphor studies media studies nationalism studies and political science

Corpus-Based Approaches to Metaphor and Metonymy Anatol Stefanowitsch, Stefan Th. Gries, 2008-08-22 The papers in this volume deal with the issue of how corpus data relate to the questions that cognitive linguists have typically investigated with respect to conceptual mappings The authors in this volume investigate a wide range of issues the coherence and function of particular metaphorical models the interaction of form and meaning the identification of source domains of metaphorical expressions the relationship between metaphor and discourse the priming of metaphors and the historical development of metaphors The studies deal with a variety of metaphorical and metonymic source and target domains including the source domains SPACE ANIMALS BODY PARTS ORGANIZATIONS and WAR and the target domains VERBAL ACTIVITY ECONOMY EMOTIONS and POLITICS In their studies the authors present a variety of corpus linguistic methods for the investigation of conceptual mappings for example corpora annotated for semantic categories concordances of individual source domain items and patterns and concordances of target domain items In sum the papers in this volume show how a wide range of corpus linguistic methods can be used to investigate a variety of issues in cognitive linguistics the combination of corpus methods with a cognitive linguistic view of metaphor and metonymy yields new answers to old questions and to new questions about the relationship between language as a conceptual phenomenon and language as a textual phenomenon

Relevance in Mind Tim Wharton, Didier Maillat, Caroline Jagoe, Kate Scott, 2024-02-09 In 1992 shortly after the publication of the first edition of Relevance communication and cognition David Trotter wrote Relevance theory is not only the most elegant version of pragmatics currently available but the most uncompromising in its view that inference cannot be assimilated to a code model of communication It asks questions which literary criticism has never been able to ask let alone answer Thirty years on new questions continue to be asked and answered in linguistic pragmatics cognitive science literary theory as foreseen by Trotter experimental psychology affective science communication studies etc The theory also appears in quite unexpected places recent applications of relevance theory include the analysis of internet mediated discourse clinical practice and even museum curation First and foremost however relevance theory is an inferential model of communication and cognition which is theoretically and empirically testable The approach still has a huge amount of potential in psychology and beyond potential this Research Topic seeks to tap into

Understanding Figurative Language Sam Glucksberg, 2001-07-26 This book examines how people understand utterances that are intended figuratively Traditionally figurative language such as metaphors and idioms has been considered derivative from more complex than ostensibly straightforward literal language Glucksberg argues that figurative language involves the same kinds of linguistic and pragmatic operations that are used for ordinary literal language Glucksberg's research in this book is concerned with ordinary language expressions that are used in daily life including conversations about everyday matters newspaper and magazine articles and the media Metaphor is the major focus of the book Idioms however are also treated comprehensively as is the theory of conceptual metaphor in the context of how people understand both conventional and novel figurative expressions A new theory of metaphor comprehension is put forward and evaluated with respect to competing theories in linguistics and in psychology The central tenet of the theory is that ordinary conversational metaphors are used to create new concepts and categories This process is spontaneous and automatic Metaphor is special only in the sense that these categories get their names from the best examples of the things they represent and that these categories get their names from the best examples of those categories

Thus the literal shark can be a metaphor for any vicious and predatory being from unscrupulous salespeople to a murderous character in *The Threepenny Opera*. Because the same term e.g. shark is used both for its literal referent and for the metaphorical category as in *My lawyer is a shark* we call it the dual reference theory. The theory is then extended to two other domains: idioms and conceptual metaphors. The book presents the first comprehensive account of how people use and understand metaphors in everyday life.
