**The Twelfth-century Renewal of Latin Metaphysics** Nicola Polloni, 2020 Dominicus Gundissalinus was both a philosopher and a translator he was active in the unique context of Toledo in the second half of the twelfth century a cultural melting pot of Muslims Jews and Christians While he was philosophically trained in the Latin tradition he found answers to the philosophical problems originating from that Latin training in the Arabic tradition of authors and texts which he himself translated Outside the boundaries of specialised knowledge and research this intriguing thinker is unknown this study contributes to the re discovery of Gundissalinus with a philosophical and historical analysis of his metaphysical reflection in order to display its profound originality and pioneering contribution to the course of medieval philosophy **Mathematical Theologies** David Albertson, 2014 The writings of theologians Thierry of Chartres d 1157 and Nicholas of Cusa d 1464 represent a lost history of momentous encounters between Christianity and Pythagorean ideas before the Renaissance Their robust Christian Neopythagoreanism reconceived the Trinity and the Incarnation within the framework of Greek number theory challenging our contemporary assumptions about the relation of religion and modern science David Albertson surveys the slow formation of theologies of the divine One from the Old Academy through ancient Neoplatonism into the Middle Ages Against this backdrop Thierry of Chartres s writings stand out as the first authentic retrieval of Neopythagoreanism within western Christianity By reading Boethius and Augustine against the grain Thierry reactivated a suppressed potential in ancient Christian traditions that harmonized the divine Word with notions of divine Number Despite achieving fame during his lifetime Thierry s ideas remained well outside the medieval mainstream Three centuries later Nicholas of Cusa rediscovered anonymous fragments of Thierry and his medieval readers and drew on them liberally in his early works Yet tensions among this collection of sources forced Cusanus to reconcile their competing understandings of Word and Number Over several decades Nicholas eventually learned how to articulate traditional Christian doctrines within a fully mathematized cosmology anticipating the situation of modern Christian thought after the seventeenth century **Mathematical Theologies** skillfully guides readers through the newest scholarship on Pythagoreanism the school of Chartres and Cusanus while revising some of the categories that have separated those fields in the past **Routledge History of Philosophy Volume III** John Marenbon, 2003-09-02 The philosophy discussed in this volume constitutes the intellectual and philosophical ideas of the medieval era from Aquinas and Anselm the intellectual philosophy of the Judaic and Arabic traditions the Twelfth Century Renaissance and the philosophical ideas associated with the emergence of the universities This volume provides a broad and scholarly introduction to the major authors and issues involved in the philosophical discourse of the medieval era as well as some original interpretations of the philosophical writings addressed It includes a glossary of technical terms and a chronological table of philosophical and other cultural events *Philosophy and Theology in the Long Middle Ages* Kent Emery, Russell Friedman, Andreas Speer, 2011-03-05 The title of this Festschrift to Stephen Brown points to the
